Olaf H. Kolstad, Victim of Fatal Shooting Mishap

G. H. Huser of Crossfield, Accidentally
Kills Companion on Hunting Trip

The late Olaf Kolstad, proprietor of the Airdrie Hotel, who accidentally met his death while hunting big game in the Rocky Mountain House district last Friday, was a well and favorably known figure in and around Crossfield.

Mr. George Huser mistaking his companion for a deer fired the fatal shot. Authorities considered an inquest was not necessary, as the incident was purely accidental.

The men were on a hunting trip with Ben Olsen, resident of Rocky Mountain House. They came upon two deer and the party separated. Kolstad following one deer and Huser going after the other. When Huser saw what he thought was the deer he fired and the bullet entered Kolstad's shoulder, passing through the heart. Death was instantaneous.

Mr. Kolstad who was in his 52nd year, came to this country from Norway about 22 years ago, and resided in Airdrie ever since.

He leaves his widow and four sons, Olaf, Norman, Percy and Bobby to mourn his loss.

Funeral services took place from the Knox United Church, Calgary. Interment was made in the Birchland cemetery. Pallbearers were A. Cruickshank, J. J. Stewart, J. R. Edwards, H. Nickelson, E. A. Simpson and Herman Cory.

Rev. Father Macdonald Delivers Interesting Address

One of the highlights in the annals of the local Board of Trade was held last Wednesday evening, in the U.F.A. hall, to which were invited representatives of the Beiseker Board of Trade, as well as the wives of the local members.

The Beiseker Board of Trade was welcomed by Geo. Huser and his remarks replied to by the Beiseker Board of Trade President, Mr. McLean.

The guest speaker of the evening was the Rev. Father Macdonald D. D. of St. Mary's Church, Calgary and he chose as his topic, "World Conditions Politically," and in an extremely well delivered address he took his listeners through Germany, Austria, Hungary, Roumania, France, Italy, Japan and China, finishing with United States and Canada. The speaker was introduced by G. Y. McLean, and the reverend gentleman caused quite a ripple of laughter when he stated that he was Irish (in fact the only real Irish name left) in stead of being Scotch as stated by his sponsor Mr. McLean. However what's in a name anyway, and Father Macdonald was given every attention, and his address greatly enjoyed.

Appearing as instrumentalists were the Misses Margaret and Kathleen Fitzpatrick, Miss Isabel Leask, and Mrs. Yule (Carstairs) and their pianoforte, bagpipe and violin selections were accorded hearty recognition.

As vocalists on the same program, Mrs. P. Fleming and Master Gavin Goldie were well received and their numbers greatly enjoyed.

One of the tidbits of the evening was the stump speech by Harry Fitzpatrick, in the role of Adolph Dinglespell and he kept his audiences in continued throes of laughter.

Accompanied on the pipes by her brother Miss Isabel Leask, gold medalist, favoured the company with two dances, the Sword Dance and Shean Truilhas. Neatly and proudly attired in full Highland costume, sporting the tartan of the Royal Stuart, she danced her way into the affection of her audience.

The vote of thanks to the speaker and the artists was given by Wm. Laut in a few well chosen words.

Just before closing the chairman C. H. McMillan called on Frank Lounk, Reeve of the Village of Beiseker, for a few words and the gentleman worthily responded with quite a humorous touch.

Are Your Lights In Good Order?

If you drive your car at nights you would do well to check up your lights.

Constable Penn informs us that the R.C.M.P. have received instructions to patrol the roads at night and check up on all cars.

It is necessary to have both bright and dim lights in order, as well as tail-lights. A reflector on the rear of a moving vehicle is not sufficient. It must be a red light with a white light showing on the license plate.

The police are also checking up on dirty and battered license plates, and will accept no excuse unless the roads are muddy.

If you have a trailer it is required that a tail-light and license plate be at the rear of the trailer. It will pay all motorists to watch their step.

Coming Events

West Hope School Christmas concert and tree, Dec. 21.

The Oneil Christmas concert and dance will be held on Dec. 22.

Dance at East Community Hall tomorrow night, Friday, Dec. 8. Music by the Victory Boys.

January 5th, next is the date set for putting on that popular play—"The Path Across The Hill." Keep the date in mind.

Keep in mind the grand Christmas dances in the East Community Hall on Monday, Dec. 25th. Special novelties. Midnight lunch includes chicken sandwiches, etc.

The Anglican church are holding a bridge in the Oliver Hotel, Wed. Dec. 13th, at 8.00 p.m. 25c each. Good prizes, good time. Short programme after supper.

Rev. Geo. Dickson of United Church, Calgary, will give his popular lecture, "Living on the Sunnyside of Life" on Dec. 14th. He will be assisted by musical talent from Knox Church.

Mrs. O. E. Jones President
Floral Local U. F. W. A.

The annual meeting of the Floral Local was held at the home of Mrs. Ableman on Wednesday. Officers elected for the ensuing year were as follows:

President: Mrs. O. E. Jones
Vice-Pres: Mrs. H. Robinson
Secretary: Mrs. H. McCool
Treasurer: Mrs. O. Bills.

OBITUARY

The late Dr. Currie. The news of the death of Dr. Currie, which took place at his residence, "Saubank," Dollar at midday on Tuesday, Nov. 14th, was received with profound regret throughout the town and district. Dr. Currie, who was a native of the island of Ilay, came to Tilloch when quite a young man and carried on his work there for a period of 40 years. He was held in great respect by all classes of the community. He retired from his practice about 14 years ago, but even after this his valued advice and kindly assistance in many respects was always sought. A busy gentleman, he always found time to take an active part in the affairs of the town and district. He was 79 years of age and leaves a widow and a son, a family of five sons and two daughters. The elder of the two sons reside in Alberta, Canada, namely Rev. A. D. Currie, Anglican clergyman at Crossfield and W. S. Currie of the C. P. R., D.N.R. Calgary.

The above gentleman was well known to a number of people in Calgary and Alberta who came from Scotland.

25 YEARS AGO

(Crossfield Chronicle, Dec. 3, 1908)
Since the arrival of the new settlers they have not let the grass grow under their feet. Out on the Rosebud where they have settled ten houses are already erected and the same number of barns.

The Airdrie Board of Trade held a regular meeting Wednesday night and the main matter up for discussion was the purchase of land for a cemetery.

BORN—To Mr. and Mrs. Martin Asmusen, a daughter. To Mr. and Mrs. M. R. Handley, a son.

MARRIED—Mrs. Mattie Harrison to Mr. W. G. Hill.

Premier Rutherford has announced the Government proposes to establish a Dept. of Railways with himself as Minister and that a progressive policy of railway construction will be inaugurated.

G. F. Mitchell shipped a car of hogs on Monday.

C. Heibel, M.P.P. was in Crossfield Monday. His automobile was out of order and he was detained in town for some time.

Is This Progress?

Were it not for the occasional event of great significance, civilization would stagger on towards wretched goal it is heading, without making being the wiser, or the more acutely aware of its steady progression. World statesmen occasionally venture the prediction that another great war inevitably would wreck the civilization of today; and the statements of these prominent men would undoubtedly be taken at their face value, were it not for sporadic manifestations of the dynamic basis which distinguishes western civilization. Other men of renown have said civilization has no goal, no great achievements to its credit, in that it is not increasing and is not increased, the sum total of human happiness. But again, some event hits the front pages of the daily newspapers indicating its triumphal march-somewhere, which completely confounds Cassandra-like prophets and claimants of stagnation.

The events which have called forth this opening paragraph are, of course, those which occurred recently in the great and glorious State of California. There, two confessed kidnappers were summarily lynched by an irate, small-town, crowd which, instead of being punished for usurping the functions of the state itself, are exonerated and even lauded by the chief dignitary of that state. In fact, Governor Rolph was so far from taking punitive measures against the crowd which (perhaps) saved his hangman a job, that he declared to the press his wish that he had the power to release all kidnappers held in California State prisons to the tender mercies of the same mob. It might, he added, act as a deterrent to kidnappers elsewhere in the United States. Thus civilization marches.

Possibly there is truth in his contention. It is equally true, however, that rigorous enforcement of the laws entrusted to his administration would serve the same purpose and achieve as good results. If his commendation is to mean that lynch law can be invoked with impunity in the name of the law against kidnapping, it might be urged that the cure is as bad as the disease. In fact, the cure was itself a disease which it took more than half a century of repression to eradicate. Governor Rolph is dabbling in a strange homeopathy; and perhaps he would be employed better in tightening up the law and its enforcement, through the police and the courts, than thus encouraging revival of a discredited attitude. That law-breakers should be law-breakers is, in effect, a protest against the law's delays and not the inefficiency of a law-enforcing machinery. Perhaps then, Governor Rolph should begin the clean-up against kidnappers nearer his own office.

They have a new premier in France. M. Chautauques is, in fact, the 101st premier France has had in some 63 years. Apparently the motto over this door of the office reserved for the chief executive in France is "Here today, gone tomorrow."

Old Lawrence Sterne it was who said: "They do things better in France." It would be hard to persuade those accustomed to the more staid and dignified British process of placing and replacing Prime Ministers, to agree with this sweeping statement. Changes in the French cabinet are made without involving the machinery of an election. They just change—that is all. A prime minister comes, and collects a cabinet around him, not of those adhering to his own political party or even sharing his political faith. He selects such individuals as appear to him to have sufficient of a loyal following among their particular groups as to ensure him a majority of the deputies. The parliament runs its course. Ministers change without consulting their platform to the people. The system removes government from the people, and tends inevitably to place the real authority in the higher class of permanent officials of the civil service. Responsible government, as Canadians know it, is impossible under such a system, while the bargaining that invariably precedes the formation of a French cabinet injects a pork-barrel element into the political arena which is repugnant to western minds.

Shipment Arrived In First Class Condition

British Firm Well Satisfied With Honey From Saskatchewan
Saskatchewan honey arrived in Great Britain in first class condition. The honey, a carload shipment, was sent to Britain on the S.S. Brandon, via the Hudson Bay, to British importing firms.
R. W. Pugh, provincial apiarist, states that W. Waldron, Saskatchewan markets representative in England, and Mr. Keith, of the Canadian publicity department, made a personal inspection of the honey at the London dock. They write that the honey landed in first class condition, the cartons being clean and the honey in a uniformly good state.
The British importing firm to which the honey shipment was consigned, writes as follows: "We are exceedingly satisfied as the honey has been delivered in excellent condition and the quality is first class."

Trying Out New Uniforms

Japanese Soldiers To Report On Silk And Wool Cloth
Official amusement expressed by the Japanese War Office over a report that the silk uniforms were to be provided for the soldiers has apparently been retracted. Experimental uniforms have now been issued to some battalions. Some of the uniforms are made entirely of silk, but most of the cloth is a mixture of wool and raw silk. The silk-clothed soldiers will be asked what they think of the new uniforms and especially in preserving warmth, effects of rain and snow on them, cost of washing and repainting.

Gilding Record For England

Gilding record for England was set up by J. Laver, of the Dorset Gilding Club, at Thirsk. He remained in the air seven hours and twenty-two minutes. Mr. Laver might have continued for a longer period, but darkness interfered with visibility. Heavy rain was falling when he landed. The record round is held in Germany and exceeds thirty-six hours.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Coal King's Rise And Fall

Valuable Treasures Collected By Pennsylvania Man Sold For Song
Under a mammoth circus tent, on a weed-grown estate where once played some of the world's most famous social lights, an auctioneer at Uniontown, Pennsylvania, barked out the epilogue of a drama of the rise and fall of a king of coal. And as piece after piece of the treasures collected from over the world by the late J. V. Thompson fell under the hammer, the husky-voiced hawkler shouted, "Why, they're going for a song—going for a song!" They continued to go for a "song," and three hours after the sale began a throng of art connoisseurs and society notables had spent only about \$11,000. The highest price paid for any article was \$2,400 for a beautiful Kirmahash rug which Thompson bought for \$20,000 while on a honeymoon in Constantinople with his Broadway showgirl bride, the Honey Hawes. A richly designed Italian scarf, the first article to be sold, brought \$18. A \$7,500 antique turban Persian rug went for \$685.

Profit In Forestry

Under Proper Conditions Tree Growing Promises Sure Returns
Planting forests frequently has been praised as profitable business, but generally has not made much of an appeal to private enterprise. The crop is too long in growing. Nevertheless, as an undertaking for governments and for long-lived institutions tree growing under proper conditions promises sure returns.

Foresters of Michigan State College recently estimated the crop value of a planting of white pine made on college lands forty years ago. The land used was valued at the time at \$15 per acre and the total cost of trees, planting labor and all other expenses in connection with the project has been \$32.75 an acre. The value of the timber on each acre at present market prices is estimated at \$158.73. College authorities therefore compute that the trees have earned compound interest at the rate of 4.05 per cent. for the forty-two years.

Writing For The Cinema

Canadian Films Will Soon Be Taking Prominent Place
Capt. Howe, a member of the board of directors of the Canadian Film Producers, addressed the Canadian Women's Club at Toronto on "Writing for the Cinema." He traced the history of the industry generally and particularly in Canada, expressing his conviction that in an unbelievably brief period the Canadian film will be taking its place among the pictures of the world—this despite the fact that so far Canada has been so lagging in the race that she might be considered as having hardly started. The speaker compared the films of the various countries, pointing out their fine qualities and the reverse, assuring his audience that he was confident that in Canada there was not only people qualified to write for the cinema, but that Canada had the material for the production of films that should be second to none.

It Happens Frequently

People Travelling In Europe Forget Most Foreigners Speak English
An Englishman who knew no language but his own had lost his way in Rome. In his perplexity it occurred to him to write the name of his hotel in large letters on his card and hand it to the first benign-looking individual he met.

An Italian thus accosted turned, and with the charming manners of his race, accompanied the perturbed Englishman for about 20 minutes of silence until they reached the hotel designated. Then the tourist poured out voluble thanks in the only language at his command.

The Italian looked at him in amazement, then remarked in perfect English: "I thought you were deaf and dumb!"

Has Lived Long Life

Ontario Woman Recently Celebrates Her 103rd Birthday
Still interested in living her century over again, Mrs. Miranda W. Hillyard recently entered her 103rd year. She was born in Frost Village, Quebec, in 1831, and has a good recollection of the soldiers scouring the district in 1837 on the hunt for Papineau's rebels.

Her parents were Edmund Winchester and his wife, Dorothy Hurrell, both of United Empire loyalist stock. In early life Mrs. Hillyard came to Ontario, and her husband, Robert Hillyard, a banker, died in St. Mary's in 1883. Her one son served in the South African war in 1900, and died in that country; the only married daughter in Philadelphia and another at home.

WORKS EASIER NOW FAT HAS GONE

"I was so stout about 11 months ago," a woman writes, "that I became a burden to myself. Then muscular enthusiasm set into my joints, and I had to go on sticks for some time. Then I started to take Kruschen's Salt, and I am overjoyed with the results. I have derived from them. Honestly, I had no idea one could feel so different in such a short time. Since taking Kruschen, I have lost nearly 25 lbs. of superfluous fat. I can now run about as well as when I was 20, cook, work, and attend to seven growing children." (Mrs.) G. H. Unlike certain drastic drugs, Kruschen does not aim to reduce by rushing food through the body; its action is "not" confined to a single part of the system. It has a tonic influence on every organ of elimination, every gland, every nerve, every vein. Gently, but surely, it rids the system of all fat-forming material, all poisons and harmful acids which give rise to rheumatism, digestive disorders, and many other ills.

Arctic Cold At Equator

Instruments Register Twenty Degrees Lower At Similar Altitude

If you were looking for a colder place than the north pole, you certainly would not go to the equator to find it, would you? As contrary to fact as the statement may seem to be, unless you did this very thing your quest would end in disappointment. Meteorologists have found that it is actually colder at the equator than it is at the north pole! For proof of this scientists journeyed to the tropics and from a position on the equator, they sent up sounding balloons equipped with meteorological instruments. At heights six or seven miles above the equator the instruments registered a temperature that was 20 degrees over the Arctic regions. As an explanation of this phenomenon it is suggested that the re-radiation of heat from the surface of the earth at the equator is retarded by humid air.

Our Best Pleasures

Six Rules By Which They May Be Found

The best pleasures are first, the simplest—pleasures which require least machinery, least effort on the part of others; second, the least expensive; third, the most accessible; fourth, those that can be most widely shared; fifth, those that can be most often repeated without doing harm to body, mind, or soul; sixth, those that call into action the highest qualities of life. The best pleasures are what we might call top-dog pleasures; that is, the pleasures of mind and spirit. If we test our pleasures by such laws as these, they will take us outdoors instead of indoors; to wholesome and not to artificial things; to wholesome exercise, and not just to idle entertainment; to music, friendship, and books rather than to excitement and things that are artificial.

Procedure To Be Abolished

No More Advance Information About Grants To Fairs

The Federal Department of Agriculture's established procedure of informing fair and exhibition managers in advance of the amount of the government grant they will probably receive, is to be abolished this year.

Delegates to the Canadian Association of Fairs and Exhibitions were told that their past annual meeting that there will be no advance information this year. George B. Rothwell, head of the livestock division of the department of agriculture, made the announcement. He said the department's estimates would be subject to revision by the government, even if the House passed them.

Faithful To Old Tradition

South African Dutch Still Greatest Bible-Reading Race

Worthy descendants of the world's greatest Bible-reading race, the South African Dutch, are proving faithful to the old-time tradition. It was expected that the new Afrikaans Bible would be a best seller, and a first edition of 100,000 copies were ordered by the British and Foreign Bible Society. But so heavy has been the demand that a cable has been sent instructing the printers to increase the edition to 150,000 copies.

BUCKLEY'S Gives You Far More For Your Money

Buckley's gives many times as far as ordinary cheap remedies, because it is not diluted with water without impairing its marvelous healing and soothing qualities, and because only a few drops are needed to put the most stubborn Bile into action. Try one sip of Buckley's give unmistakable relief. "A single sip proves it." No drug—no sweet sticky syrup—but a scientific formula that cures colds, headache and coughs. Play safe. Refuse substitutes. Buckley's sold everywhere.

Lord Lonsdale's Model Estate

Every Small Detail Of Management Watched By Owner

Lord Lonsdale, in addition to his many-sided sporting interests, is chairman of a publishing firm. He has wonderful way with animals—in particular with horses and dogs and birds. At meal times at Lower each privileged dog comes into the dining-room, goes sedately to its own particular corner, and there settles quietly with one eye fixed watchfully on Lord Lonsdale's movements. The stables would give any maker of films a mass of material no other establishment of these days could offer, says the Overseas Mail. They are magnificently run in the old-fashioned English manner—as, indeed, the whole house is—without any regard to the modern love of informality and speed. Lord Lonsdale has kept all his old coaches and carriages—in themselves a small museum which will interest future generations. All of them are painted the bright yellow which makes his cars so recognizable at race meetings today. And he himself watches every small detail of the estate's management—even to the laying out of the gardens, which was done to his particular instructions; each is of a different character, Italian, French, and so on.

Air Fields Across Canada

Within A Year Stations Will Be Ready For Service

A year from now air fields across Canada will be ready for a trans-Canada air service, Brigadier J. Lind, any Canadian, commanding officer of M.D. 12, told the Young Men's Board of Trade at Regina.

Single unemployed, Brigadier Gordon pointed out were doing work that would prove a boon to the future of aviation in Canada. The great obstacle to a trans-Canada route in the past, the northwestern part of Ontario, was the scene of camps for the preparation of airports. By next fall Canada would have ground facilities to permit the establishment of an air line from Halifax to Vancouver, Brigadier Gordon pointed out. This would lie on the shortest route from Europe to Asia. The Pan-American airway had already received concessions on a portion of the route, which would have a terminus in Newfoundland.

He spoke of the possibility of competing with the United States in the future with ships and air. He said, passenger traffic was so small in Canada as not to merit the operation of an air line simply for passenger purposes.

Foreclosure Proceedings

Large Tracts Of Land In Manitoba and Saskatchewan Are Involved

Foreclosure proceedings involving first mortgage debentures in excess of \$850,000 and second mortgage debentures of \$718,000 on large tracts of land in Saskatchewan and Manitoba settled during the past eight years by Mennonites, have been taken in Saskatchewan courts. By an order made recently arrears must be paid by October 3, 1934, or foreclosure will become absolute. The debenture bonds first issued were sold to large investors in Canada while the second issue bonds were sold mainly to Mennonites already settled in Canada and the United States. The company promoting the settlements was the Intercontinental Company. The National Trust Company has been named trustee for the first mortgage debenture holders. The decision of the court does not affect the position of the numerous settlers.

Radio Examinations

Fifty-one Candidates Examined During Month Of October

The radio branch of the Department of Marine announces that 51 candidates were examined during the month of October. Successful candidates who obtained certificates of proficiency in radio included: Commercial—N. N. Hall and H. C. Hayward, Vancouver; W. H. Randall, Moose Jaw.

Amateur—H. F. Freeman and S. E. Mills, Calgary; H. E. R. Sullivan, Jasper, Alberta; J. Bowey, Munson, Alberta; R. Hill, Bamfield, B.C.; V. E. Howard, Vancouver; T. L. Ascroft, F. H. Meek and L. C. Parkhurst, Vernon, B.C.; H. L. Alexander, Victoria, B.C.

New Air Mail Route

The Indian air mail plane which left London, England, December 9, carried Christmas letters and packages destined for the Straits Settlements via Rangoon over a 1,500-mile addition to the route flown now. From Rangoon the mail will be flown to Singapore. The first return flight from Singapore will be made on December 31, reaching London, England, January 10.

with Ogden's Cut Plug has learned how to insure full pleasure in pipe smoking.

Home after a hard day's work—"the little woman" brings a light to your well-tamped bowl of Ogden's Cut Plug—that's real comfort! And every pipel of Ogden's adds to your enjoyment right down to the last fragrant puff. Such cool, companionable goodness can only come from a tobacco grown, cut and made for pipes only.

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

On Job Seventy-Six Years

English Hand Kitter Ninety Years Old Still Working

Who is the United Kingdom's oldest worker? One, Robert Harrison, of Calverton, Nottinghamshire, England, can lay a strong claim to this title, for though in his 90th year he is still working at his job of turning out half-hose.

Seventy-six years ago, when only 13, he began work in the little cottage industry in Calverton. He was then one of several hundred workers. Today he is one of a dozen or so who are keeping alive the ancient trade of hand-frame knitting in a machine-dominated world. He has been in the employ of one firm, Morley's, whose senior craftsman he is, the whole of his working life.

Aviator Had Narrow Escape

Vulture Crashed Into Front Of Imperial Airways Liner

Thrilling adventure befell the Imperial Airways liner "Aretusa" on its journey from Giza, India, to Calcutta. A vulture suddenly appeared ahead and crashed into the front of the cockpit, just below the glass-screen. By the force of the impact, the plating was bent inward and cut open the pilot's hand. The bird was killed outright.

Will Never Be Expert

The Prince of Wales spoke of his practice with the chunter (part of the bagpipe) at a Masonic banquet in Edinburgh. "It is true that some months ago I was learning a few tunes," said the Prince. "If ever I am able to play in a pipe band in Edinburgh I should be very pleased, but I should never give a solo."

Unique Banquet Held At Royal Winter Fair When Menu Featured All Canadian Products

Several hundred farmers from all parts of Canada were present at a banquet during the Royal Winter Fair, held in Toronto, November 22 to 30 at which every item on the menu was the product of, or nearly all of them, farm products.

There were oysters from Prince Edward Island, and the shell fish from there are incomparable. Alberta provided the sugar, produced from sugar beets grown at Raymond near 1-1/2 bridge. British Columbia sent celery and fruits, and Ontario also provided fruits and other edibles. The bread was made from flour from Saskatchewan wheat. The turkeys came from Manitoba and cranberries for the accompanying sauce were from Brunswick.

Neither ice nor coffee was served at this banquet, the beverages being limited to apple cider from Nova Scotia, grape juice from Ontario, and Canadian-made ginger ale. The cauliflower came from Quebec, potatoes from New Brunswick, and the pumpkin pie from Ontario. The Canadian Government Central Experimental Farm, Ottawa, supplied the cheese, and Ontario and British Columbia furnished the nuts.

Although Canada is a great exporter of food products, she imports large quantities of foodstuffs, particularly seasonal fruits and vegetables, much of which comes from the United States.

This All-Canadian banquet a feature of the Royal Winter Fair, is just a little demonstration that Canada can feed herself if necessary and suffer little, if any from lack of variety or quality—Canada We Eat By Week.

Chemists' New Discovery

Cod Liver Oil Can Now Be Taken In Palatable Form

As a result of experiments made by Canadian chemists a method has been found whereby the beneficial properties of cod liver oil can be taken in a pleasantly palatable form. By the new process the fresh cod livers can be mixed with cocoa in such a way that all the health-promoting properties of the livers are retained without any oiliness or objectionable taste or odour remaining, and the mixture can be successfully used in the manufacture of a chocolate-coated confection.

Manufacture of the candy has already been undertaken and although a small bar contains the equivalent of a tablespoonful of cod liver oil, persons who have eaten it declare that it is impossible to notice any taste of the oil. The liver-cocoa mixture has also been used in making ice cream and milk and egg shakes. On the other hand, while the mixture carries no taste or smell of oil, it is produced by a "cold process" and it is stated that there is no impairment of the livers by chemical or physical changes and they therefore retain, unchanged in quality, their natural maximum quantity of Vitamin "A," the anti-rickets preventive, as well as substances for poise therapy and the correction of pernicious anaemia.

Among the fish caught in the sea fisheries of Canada cod is one of the most valuable. The annual catch is about 15,000,000 pounds, practically all of which is caught in the Atlantic.

Weekly Cattle Shipments

In addition to direct shipments from Saint John to Great Britain of approximately 1,000 head of cattle a week throughout the winter, it is probable an additional 1,000 a week will be fed and watered at St. John for trans-shipment to London, England, Thomas Nagle, member of Saint John harbor commission, announced.

Will Distribute Seed Oats

Plans are being carried out to provide about 3,500,000 bushels of seed oats for distribution in the grass-hopper and drought-affected areas of Saskatchewan. Although some seed wheat also will be required, the amount will be small as compared with the 1932 distribution of some 4,500,000 bushels.

Fall Rye Average Less

Fall rye acreage in Saskatchewan in 1933 shows quite a decrease from the figures for 1932. In 1932 there were 264,000 acres of this grain seeded in Saskatchewan, and this fall the acreage is given as 210,000. The total decrease in Canada, 50,300 acres. Saskatchewan shows the greatest decrease of all provinces.

Canada comprises 27 per cent. of the total area of the British Empire.

Swiss Watch Trade Menaced

Japanese Selling Timepieces In Geneva By The Pound

"Why buy one watch? Buy a pound of watches."

This has become the slogan of Japanese dumpers on the Swiss watch market. Watches "made in Japan" are selling in the Jura district of Geneva for 18 Swiss francs a pound—and no local manufacturer can compete with them. That delicate timepieces should be sold by the weight like common nails or tacks has stunned the big watchmen of Switzerland.

An urgent emergency measure based on eighteenth century economic reasoning has been hurriedly put into force to protect the age-old Swiss trade.

All watch machinery exported from the country is taxed a prohibitive export duty of 9,000 Swiss francs, according to the measure.

This tax is based on the theory that the only way to beat competition is to prevent it. "Keep the watch machinery in the country and there will be no foreign competition," says the Swiss government.

But the leading manufacturers are not satisfied and are asking for stronger protective measures. They demand a quota system be applied to all foreign watches.

ANOTHER STEP IN AVIATION

A new type of autogiro without wings or rudder, invented by Senor De La Cierva, makes its first appearance at Hanworth Aerodrome, Middlesex, England. The remarkable feature of the machine is that the pilot has perfect control at the lowest speeds. Senor De La Cierva's latest discovery is that ailerons, elevators and rudder are unnecessary, and his model is amazingly simple to control. The pilot has merely to tilt the rotors in the requisite direction by moving a single lever, and the machine will move upwards, downwards, and sideways as he wishes. The top speed of the machine is equal to that of the equivalent aeroplane. Senor De La Cierva, at the controls of the new "Direct Control" Autogiro, is landing his machine tail-first.

Byrd Expedition Using Oil-Finding Machine

To Determine Whether Land Or Water Lies Under Ice Cap

Daily directions from Tulsa, oil capital of the United States, will be waited by short wave radio to the Byrd Antarctic exploration party as it tests to determine thickness of ice that blankets the Antarctic continent.

The testing will be done with seismographic equipment that records the paths and deflection of sound waves beneath the surface of the ice when explosives are discharged. It will determine whether water or solid soil is beneath the ice.

The equipment, used in explorations for oil in the United States, was developed by a Tulsa firm, and it is this firm that will give the radio directions.

The station is being assembled now and will be ready for use January 1, 1934, when the Byrd party is expected to start actual work in the Antarctic. Daily reports of progress will be received, all the messages being in code.

The equipment was developed by the Selamograph Service Corp.

Present For His Jailor

Charles Blanda, convicted southern Colorado gangster, spent 26 days of his sentence in the Pueblo County Jail, and used eight large boxes of matches in constructing a miniature house, which he presented to a jailer on his release. The tiny bungalow, complete in every detail, is electrical, lighted, has tin foil carpets and is constructed entirely of matches except for bits of drapery, glass and cardboard.

Making Stations Attractive

Europe And England Realize Gloom Not Attractive To Tourists

Good news for tourists is the announcement that the primordial gloom of European railway stations is to be dispelled by a brightening-up process.

The cold, dank atmosphere of stations in Britain, the railways realize, probably has done more than anything else—next to bad hotels—to keep foreign visitors from returning. By reducing their fares recently, they also found that Englishmen were ready to travel by rail instead of motor cars if conditions could be made slightly more attractive.

Meanwhile, water taxis have begun appearing on the Thames to provide the commuter a novel and pleasant way of going to the office. Until now the Thames alone has escaped the traffic congestion common to London's narrow streets.

China Forbids Torture

Cannot Be Used To Get Confessions From Accused Criminals

Use of torture to extract testimony or confessions from persons accused of crime is hereafter to be forbidden in China, according to a decision reached at Nanking, by the Central Political Council. The council also decided to instruct the authorities in all provinces to make arrangements for release, on bail, of all persons held in jail but not yet tried, or whose cases are pending upon appeal.

Motor riding in Germany is increasing.

Basic English Suggested As A Simplified Language For General Use The World Over

Raising More Sheep

Marked Increase In Number On Alberta Farms

Striking evidence of the decided swing to mixed farming is the marked increase in the number of sheep on central and northern Alberta farms. Small farm flocks continue to climb and, according to authorities, there is a wide market for Alberta wool in England and elsewhere. The price of wool has increased more than 100 per cent. over last year.

In the 1931 census, 72,169 farms in Alberta reported the possession of sheep, compared to 59,856 farms in 1926.

The sheep population of the province grew from 510,000 in 1927 to 833,700 in 1932. The value of sheep per head in 1932 dropped to its lowest level in more than 30 years.

J. F. Andrew, assistant deputy Minister of Agriculture, is the authority for the statement that there is a definite place for the small farm flock on northern and central Alberta farms, each flock tending to make the farm more of a self-contained unit.

Mr. Andrew commented on the steady increase of farm flocks in northern and central Alberta, one indication of the backward drift of farm population. Not many years ago, a flock was something of a rarity except in the southern part of the province.

Printing Crime News

Publicity Is Punishment Which Many Law Breakers Fear

Dr. S. Parkes Cadman, noted lecturer and preacher, presented an interesting thought upon the publication of crime news in a recent speech. He said: "It is not the publicity which should distress us, but the deeds that covert concealment. If their wickedness were done in secret, how they would flourish. Rogues could strut among us unshamed and thieves and assassins commit their act with far less fear of detection." Every newspaper can produce evidence of the value of publicity as a deterrent to crime by the number of requests which are made from time to time to keep names out of the paper in connection with police court news, showing that publicity is a punishment which is feared.—Chatham News.

Advice For Dentists

Keep Patient's Mind Occupied Is Secret Of Painless Work

Dental "small talk," that constant line of chatter which the practitioner tries to keep the patient's mind off the buzz of drills and the yank of forceps, now is glorified under the name of applied psychology.

Delegates to the annual convention of the Western Pennsylvania Odontological Society extracted that bit of wisdom from an address by Dr. C. A. Whitmer, of the University of Pittsburgh.

"A great many people go to a dentist believing they are in acute pain. They really are not—but there's no reason to tell them so. Just treat them as if they were in pain for a while and then, when you say, 'Now, that doesn't hurt a bit, does it?' they'll think they feel fine."

Of course, if the patient is really in pain—

England Getting Fresh

Chickens From Canada

Former Shipments Were All Confined To Cold Storage Supplies

Fresh Canadian chickens are now being shipped to Britain for the first time. The shipments are made possible by recent tariff changes in Great Britain which admit empire poultry duty free while foreign poultry must pay three pence per pound duty, which is much higher than the former rate of 10 per cent. ad valorem.

Formerly Canadian shipments of poultry largely were confined to cold storage supplies. The four leading suppliers of poultry for the British market were Hungary, Irish Free State, Serbia and France, while Canada came sixth.

Early Settlers

Asiatic peoples were crossing the Bering Straits into Alaska and western British Columbia and western Canada as late as 1300 A.D., Dr. Marius Barber told the Royal Canadian Institute, recently, in the course of an address on the "Early Peopling of Canada."

Railway carloadings in Germany are showing a marked increase.

"Basic English," a simplification of the English tongue intended to provide a workable solution to the language communications problems of the world, has been launched by the Orthological Institute of Cambridge, England.

Failure of many attempts to provide an "invented" language that could be used throughout the world as a means of communication between the people of all nations who speak 1,500 living languages led to the effort to adapt the English tongue for the purpose.

The new form of English, introduced to Canada at the Institute of Pacific Relations Conference at Banff, in August, contains only 850 words, 160 of them nouns, 150 adjectives, 16 verbs or names of operators and the rest adverbs, prepositions or names of directions.

These, in addition to numbers, weights and measures, the calendar and such words as club, radio and telegram, already internationalized, do the work of 500,000 words of English at a level of ordinary communications.

English was chosen for the new medium because it is the natural or administrative language of 500,000,000 people, and because no other language is susceptible to the same kind of simplification. With no inflections and analytic in structure it is not only closer to the language habits of many Orientals but, for the same reason, is easier to learn.

The interest with which persons in all parts of the earth have turned to this form of English (in which this paragraph is written) gives its backers the belief that it may be put to a great number of uses. Letters have come from the Orthological Institute in Cambridge by the thousands from all parts of Europe, the Far East and the United States. Schools in the states on the American Pacific Coast are interested in it as a way of helping the young Chinese and Japanese to a good knowledge of English. In China, where English is the second language, there is much interest in it, and Japanese teachers are about to put it in their schools.

Widely different uses of a word are eliminated in the new medium, such as "for" in the sense of "because," "that" in the sense of a relative pronoun, or "bit" as part of a horse's harness. It makes use of the fact almost all verbs can be analyzed into one of a few fundamental operations in combination with a directive. The simplest combinations of these equivalents for 2,000 common verbs, such as "put in" for "insert," "go up" for "climb," "take out" for "extricate," and "go against a law" for "break a law."

In the same way, by descriptive analysis, many names of things are reduced to telescopic terms. A "journalist" becomes "a newspaperman," and a "desk" a "writing table."

Hurricanes Above The Earth

Terrific Storms Observed At Height

Of sixty miles or more. That terrific storms rage sixty miles above the earth is the report of Dr. Charles P. Olivier, of the University of Pennsylvania. Some of these hurricanes, travelling at 150 miles an hour, blow at an angle of 55 degrees at a speed great enough to draw a balloon upward at twice express train speed. Three high-speed winds were observed and measured with the aid of meteor "trains," according to Dr. Olivier. They were caught while fourteen stations between New York and Fredericksburg, Virginia, were charting the flight of the Leonid meteors. One of these trains was watched for several minutes while it floated between fifty and sixty miles up. Several stations checked its motion accurately. The wind drove the train upward at an angle of 55 degrees and a speed of 143 miles an hour.

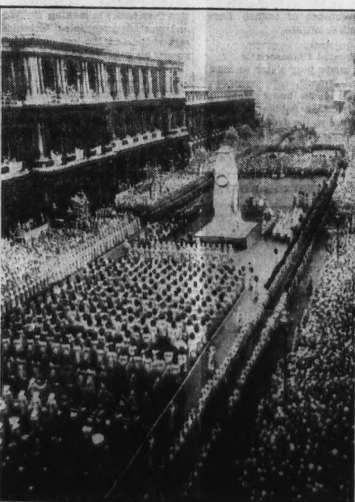

King George Has Tattoo Mark

It is not generally known that George V. the sailor king, has like many other sailors, a tattoo mark. This fact is revealed by Capt. R. G. Griffin in an English magazine. In his boyhood, when making a world tour on the "Bacchante," King George had a dragon tattooed on his arm in Japan. The Japanese artist did the job so thoroughly that the mark is still there.

Sky Was Not Red

The Soviet flight to the stratosphere that bettered Prof. Piccard's record was a deep disappointment to Moscow, states The Argonaut. The sky at eleven miles was a deep, a very soft, purple—not red.

UNIQUE PICTURE OF ARMISTICE DAY CEREMONIES

This picture, taken by the infra-red process, shows a general view of the impressive two minutes' silence at the Cenotaph in Whitehall, London, England. The red uniforms of the guards become almost white, and the trees along Whitehall change to perfect specimens of orange blossom as the infra-red pierces the misty morning to reproduce a remarkable photograph.

AFGHANISTAN'S MILITARISTIC MONARCH

Our picture taken at the opening of an Infantry School in Afghanistan, shows the new King Zahir, dressed as a private soldier. The picture was taken shortly before the young King's father, King Nadir Ghazi, was assassinated in his palace on the eighth of November.

WORLD HAPPENINGS BRIEFLY TOLD

Temperance will be included in the study course of 800,000 Minnesota public school pupils beginning next September.

The "friendship" peace pact between Yugoslavia and Turkey was signed recently by emissaries of both countries.

Upward of \$100,000,000 has been loaned farmers by the United States farm credit administration since March to help alleviate mortgage troubles of agriculturists.

"There can be no question of an all-Irish parliament," declared Viscount Craigavon, premier of Ulster since the Irish partition, in a statement two days before polling in the northern Ireland general election.

Hon. C. H. Cahan, secretary of state in the Dominion cabinet, recently left Montreal for Boston, where he will board the "Lady Hawkins," for a holiday cruise through the West Indies and to British Guiana.

After entertaining thousands of Century of Progress visitors with poisonous snakes, Hadj Mohamed, 93, returned to his native Tunis, Africa, only to be fatally bitten by one of the reptiles.

The American Library Association, which includes members in Canada as well as the United States, has selected Montreal for the 56th annual convention. It is announced. The convention will be held in June, 1934.

The tariff board has ruled that roasting peanuts is a manufacturing process and therefore subject to sales tax. The board turned down an appeal made recently by the Canadian Fruit and Vegetable Association for a contrary ruling.

Dr. Alan Blair, Canadian member of the medical faculty at University of Alabama, who recently allowed a "black widow" spider to bite him in the interest of science, has now fully recovered and plans to continue his experiments.

Canadian oats possessed special keeping qualities and were therefore purchased by the war office for the reserve supply depot, Captain A. Duff-Cooper, financial secretary to the war office, explained in answer to a question in the British House of Commons.

Wins Poultry Prizes

Dick Irvin, Famous Hockey Player Is Poultry Fancier

Dick Irvin, coach of the Toronto Maple Leafs hockey team, knows how to turn out smart poultry as well as smart hockey players. He showed the best Wyandotte cockerel at the Royal Winter Fair and captured sixth and seventh prizes with a hen and a pullet.

This is the second time the well-known sportsman has walked off with honors for chickens at the Royal. He showed for the first time last year, and at that time won third and fourth prizes in Wyandottes. Mr. Irvin hails from Regina, and his win makes the first time this prize has been taken by the west.

There are others in the sports world who chase poultry in the winter, and raise chickens, cows and horses in the summer. It was learned. Buzz Boll, of the Maple Leaf. Mr. Irvin said, has a ranch at Regina. The famous Boston Bruin hold-out, Eddie Shore, and the Cook Brothers of the New York Rangers are neighbors, as distances go in the west, of the Irvin ranch.

Mr. Irvin has been raising chickens for 22 years—ever since he demonstrated a preference for Regina over his native city, Hamilton.

He also raises racing pigeons and Great Danes.

"I'm coming back to get the Leghorn prize next year," he said.

A Hungry Population

The following is an estimate of what the London Zoo needs for food for the animals: Apples, 8 tons; grapes, 2 tons; currants, 10 cwt.; sultanas, 52 lbs.; oranges, 14,680; meat, many tons; egg yolk, 140 lbs.; eggs, 20,000; syrup, 201 lbs.; condensed milk, 18,000 lbs.; and 450 gallons; dates, 18 cwt.; nuts, 15,000 lbs.; biscuits, 6 tons; honey, 61 lbs.; bread, 6 tons; vegetables, 30 tons; fish, 15 tons.

A New Antiseptic

A new antiseptic with extraordinarily powerful germicidal properties has been announced by Western Reserve University at Cleveland, Ohio. The substance was described as 1,202 times as powerful as carbolic acid in killing pathogenic bacteria, yet is non-poisonous, non-destructive to tissues of the body, colorless in solution, odorless, tasteless and non-corrosive to surgical instruments.

Prison Has Model Dairy

Surroundings Of Reformatory At Bakersfield, California, Are Attractive

Being a rosy-cheeked milkmaid in an Adamless Eden is no great attraction for any woman, ancient or modern, according to the theory of Sheriff Cas Waler, of Kern County, California, himself a typical western sheriff and a first-class cowhand.

"They will get tired of it," commented Sheriff Waler, on a visit to the new State Prison for Women, which includes a model dairy. The sheriff's comment was prompted by the arrival of thirty additional women prisoners from San Quentin. The first contingent of 28 women arrived at the new institution last month. The prison will soon provide sanctuary for 145 women prisoners.

The model reformatory is in a secluded valley fifty miles east of Bakersfield in the mountains.

Each inmate has an attractive room, and each dormitory has a separate kitchen and dining room.

The group of buildings was erected at a cost of \$500,000 on the 1,800-acre farm which the women will operate.

Motorists Meet Crocodile

Contented Night-Of-Way On Kenya Colony Bridge

A huge bridge which spans the head waters of the Nile at Jinja, Kenya Colony, carrying rail and road traffic, is also appreciated by wild animals. Two motorists were started when their lights picked out in the middle of the road over the bridge the huge form of a crocodile, which snapped its jaws threateningly, and refused to move. The motorists were compelled to shoot it.

By Ruth Rogers

LOVELY AND SMART AS PAINT IS TODAY'S APRON WITH ITS MODISH NEW SHOULDER LINE

It is designed to give the figure a new line. The neckline is extremely neat and trim. It's so simple and comfy to slip into when one finds it necessary to go into the kitchen with her "bestest" dress. You can bind all the edges with a contrasting colour if you prefer. The buttons may match the binding. Style No. 823 is made in sizes small, medium and large. The medium size requires 1 1/2 yards of 38-inch material with 3/4 yards of binding. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

WASHINGTON PRUNE PARFAIT

2 cups cooked prunes.
1/4 cup sweetened condensed milk.
3/4 pint whipping cream.
2 oranges.
12 candied cherries.

Remove pits from prunes and cut into small pieces. Peel oranges, removing all white membrane, and cut oranges into small pieces. Cut eight cherries into small pieces, saving four to decorate ice cream. Whip cream. Combine prunes, oranges, cherries, and condensed milk, mix thoroughly, add whipped cream and mix again. Pour into refrigerator pan, decorate top with remaining sliced cherries, place in freezing unit and freeze three or four hours.

QUICK CABBAGE

1 1/2 quarts shredded cabbage.
8 cups milk.
1 cup cream or rich milk.
2 1/2 tablespoons butter.
2 1/2 tablespoons flour.
2 teaspoons sugar.
Salt and pepper.

Cook the cabbage for two minutes in the three cups of hot milk. Add the cup of cream or rich milk, the blended butter and flour, sugar, salt and pepper. Cook rapidly for three or four minutes. The result is a crisp vegetable, delicate in flavor and color.

To Protect The Foolish

New York Bars Sale Or Use Of Eyebrow And Eyelash Dyes

The sale or use of eyebrow and eyelash dyes containing harmful ingredients was banned in New York recently, as health authorities sought to curb the spread of eye maladies in the city.

Health Commissioner Shirley Wynne announced that the Board of Health had amended section 128 of the sanitary code to prohibit the manufacture, sale or use of dyes containing high percentages of aniline derivatives or silver nitrate.

Seemed Unreasonable

"What made your sister so mad?" questioned Jimmie.
"Ah, she don't know what she wants," returned Bobbie in disgust. "She sent me to the drug store to get some cold cream. I got ice cream, because that's the coldest kind they had, an' now she's sore about it."

Italy's New Postage Stamp

Series To Celebrate Tenth Anniversary Of Fascist Government

To celebrate the tenth anniversary of the Fascist Government of Italy, Signor Mussolini has issued a series of new postage stamps, among them a design which has caused much comment and opposition from the Vatican.

The brown oblong 30 Centesimo stamp sets forth in the center the open Bible standing on a pedestal, which rests on the wings of an eagle, symbol of inspiration. On the open page of the Book is inscribed the word "Evangelium." On the lower part of the stamp is the word "Credo"—Believe. In the rear of the open Bible is the Cross, not the crucifix. On the left, before the Bible and the Cross, are the flags of Italy and the emblems of the Fascist regime, lowered in salute.

Narrowly Escaped Tax

Pitt Once Had Idea To Make Umbrellas Add To Revenue

Umbrellas have the distinction of being one of the few articles in common use which have never been taxed, but once at least they had a narrow escape, says the Manchester Guardian. When Pitt was looking round for additional sources of revenue to finance the war with France he wrote to a friend in Somersetshire inviting suggestions. Back came the reply: Tax umbrellas, and make all the bishops order the prayer for rain to be read in all the churches till the end of the war." Perhaps Pitt doubted the compliance of the bishops, for the suggestion was not adopted.

Climbs High Mountain

Old Scotsman Succeeds In Reaching Summit Of Ben Nevis

Unusual record was set by E. Provost James Fisher, of Rothsay, Scotland, who is just seventy-eight. He claims to be the oldest man in Great Britain to climb Ben Nevis. He was four hours in making the ascent, and was unaccompanied, although he met visitors at the top, one of whom signed his card. He did not, he states, feel fatigued, but only a little thirsty.

Widower (introducing middle-aged and wealthy fiancée)—Come here, children, and give this lady a kiss. This is the new mother I promised you.

Tommy—But, daddy, she isn't new.

NOTED ARTISTS RESUME BROADCASTING

LAWRENCE TIBBETT
RICHARD CROOKS
The many radio fans who appreciate good music will be glad to know that Lawrence Tibbett and Richard Crooks resumed broadcasting on Dec. 4th and will be heard alternately every Monday night throughout the winter months over the N.B.C. Network.

SUNDAY SCHOOL LESSON

DECEMBER 10

PAUL IN CAESAREA

Golden Text: "Herein I also exercise myself to have a conscience void of offence toward God and men always."—Acts 24:16.

Lesson: Acts, Chapters 21, 26.

Devotional Reading: Psalm 21-18.

Explanations and Comments

Accused By Tertullus, 24:1-9.—Lydia, the Chief Captain, had charged Paul's accusers to appear against him before Felix. Within five days the high priest Ananias with a deputation from the Sanhedrin arrived in Caesarea. Paul was summoned for trial. Tertullus, the advocate whom the Jews had engaged, presented their case against him. After fulsome words of flattery for Felix, even expressing gratitude for his reforms, Tertullus accused "this pestiferous fellow" of three things: inciting disturbance against the Jews throughout the Roman Empire—an offense against the Roman law; being the leader of the sect of the Nazarenes—an offense against the law of Moses; and denying the temple—an offense against both the law of Moses and the Roman law, since the latter protected the Jews in their worship. When Tertullus concluded his speech, the deputation of Jews emphatically endorsed all that he said.

Felix's Defense, 24:10-21.—When Felix made a gesture signifying that Paul should make his defense, Paul quickly answered the charges that had been brought against him. He began in a courteous way saying that he spoke with great confidence because Felix had judged his nation for some time and was well acquainted with the state of affairs. Contrast his courteous beginning with the fulsome flattery of the opening of Tertullus's speech.

Then Paul denied that he was a disturber of the public peace (the first charge, verse 17); it had been but twelve days since he came to Jerusalem for the opposite purpose of acquiescing in the investigation could be made and no proof of its enemies' charge would be found.

That he belonged to the so-called sect of the Nazarenes Paul acknowledged, but he was not an apostate from the Jewish religion (the second charge, verse 18), for he served the same God and believed the law and the prophets. "The law and the prophets" stand for the Old Testament writings. Christianity, the Way, was not a new religion in Paul's mind, but a development of Judaism. "To believe the Bible is something more than to believe its letter and some times something different. It is to believe what God intended by the letter. If the Scriptures taught circumspection and other ceremonies, Paul knew their intent and their limitations. He knew and defined the object of the law (Galatians 3:24). He saw no antithesis between his teaching and that of Moses (Romans 7:12; Galatians 3:21).—James M. Stiefer.

He believed in the resurrection of the just and the unjust, as did the Jews before him, Paul claimed. Because of this belief, Paul strove to have a clear conscience toward God and toward men.

"I sat alone with my conscience. In the place where time had ceased. We discussed of my former living in the land where the years increased. And I felt that I should have to answer."

The question it put to me. And to face those questions and answers. In that dim eternity."

Officials Strong For Newspaper Advertising

Ile Of Man Publicity Board Pleased With Results

Newspaper advertising has so well paid the Isle of Man this year that the official publicity board is asking the Manx Government for an additional sum of \$7,000 for advertising next season to supplement the customary grant of \$35,000 which legislature annually makes for this purpose.

Publicity board officials report they have never previously received so many applications for guides to the island in one year.

W. A. Clague, the secretary, said the efficiency of a judicious newspaper advertising campaign in attracting visitors had long been proved by his board. It was not just a matter of chance—the results could be counted upon.

Going After Business

Germans are pushing business in the Canary Islands more than ever before. The English-built mole at Santa Cruz is being extended by a German firm, and harbor improvements at Las Palmas also are in the hands of Germany. Germany has secured the contract for flour for Tenerife, and nearly all the new building done on the islands is in German hands.

A Real Bargain

Sandy Macpherson and Maggie, his wife, stopped in front of a restaurant window in which was hung a card bearing the words: "Luncheon from 12 to 2 p.m. 1c. 6c. 12c. 18c. 24c. 30c. 36c. 42c. 48c. 54c. WHEAT BOARD NECESSARY TO SOLVE PROBLEM

Calgary, Alberta.—Wheat marketing boards for the large wheat exporting countries of the world, each with control of the entire production of its country, were suggested by Premier J. E. Brownlee, of Alberta, in an address to the annual meeting of the Alberta wheat pool. The government leader suggested Canada should take the lead and establish such a wheat board. The wheat problem would never be solved under the present marketing system, he said.

Intimating the next few months will see methods considered in Canada of implementing a plan for wheat acreage limitation, the premier said the plan must only be considered as a temporary measure to aid general world recovery. He recommended each individual farmer reduce acreage and each country place sale of its wheat under one control.

Discussing financial policies, Mr. Brownlee said he hoped when a settled monetary policy was achieved by the United States it would be accepted as a standard for the world. He blamed the world's surplus of wheat on financial policies of Canada and the United States in adhering so long to the gold standard.

The recent international wheat conference in London was the first attempt to break down extreme nationalism, Hon. M. A. MacPherson, attorney-general for Saskatchewan, told pool members here.

There is some hope in the world that reason will prevail when 22 nations can get together around a table and agree on an international policy," he said. Mr. MacPherson, who attended the London conference, reviewed the many problems of the present wheat situation.

Hon. John Bracken, Premier of Manitoba, also addressed the delegates.

Mr. Bracken said the problem of grain production had been solved "where it is capable of being solved." "The problem not solved," he said, "is that of distribution of wealth produced and it is a far more difficult one."

Resigns From Cabinet

Hon. E. B. Ryckman Relinquishes Duties On Account of Ill Health. Ottawa, Ont.—Hon. E. B. Ryckman, Minister of National Revenue has resigned, according to an announcement made by the Prime Minister.

Announcement of Mr. Ryckman's resignation was made in the following terms: "The Hon. E. B. Ryckman, K.C., M.P., Minister of National Revenue since the formation of the present government in 1930, has been compelled to relinquish his ministerial duties because of failing health. He has tendered his resignation to the Prime Minister, and his Excellency the Governor-General has accepted the same. Mr. Ryckman remains a member of the House of Commons. "The Prime Minister and the members of the government deeply regret that one of their colleagues is compelled, for reasons of health, to resign his cabinet position and earnestly hope that a period of complete rest will restore him to his normal health." No mention has yet been made in official circles of a successor to Mr. Ryckman.

Denounces Newsreel

London Times Decries Presentation of American Sensationalism. London, Eng.—The Times has denounced in a vigorous editorial an American newsreel motion picture showing a reconstruction of the murder of Brooke Hart, wealthy young Californian, and the lynching of his confessed kidnappers.

"This," The Times said, "is the latest and most horrifying manifestation of the growing tendency to sacrifice all decency to sensationalism in presenting news on the screen." "The picture, now being shown in London, closes with a flash of one of the lynched kidnappers hanging from a tree, surrounded by a howling mob. Newsreels are not under jurisdiction of the British board of film censors."

Want Efforts Continued

Edmonton, Alberta.—Expressing its approval by resolution that Canadian delegates to the league of nations assembly want on record as being opposed to the private making of armaments for profit, the fourth annual peace conference, in Edmonton, urged the government at Ottawa to continue its efforts in this direction.

W. N. U. 2023

Market For Liquors

United States To Seek Exchange Of Commodities Abroad

Washington.—The United States will give Canada and other countries a market for their liquors in exchange for a place to sell surplus farm and industrial products.

Such reciprocal trade agreements are now in process of negotiation with several countries.

Government officials made this known at a hearing on a code for importers that would give the federal alcohol control administration authority to limit the volume and origin of wine and spirits imports on a quota basis.

Hastening the administration's plan to be in complete control of the liquor situation December 5—the repeal date—President Roosevelt at Warm Springs named the five members of the federal alcohol control administration that will supervise the industry while congress can enact permanent legislation.

Disclosure of the government's intention to bargain with foreign liquor exporting countries to lower their trade barriers to United States products was made by Mordred Eisele, economic adviser to Secretary for Agriculture Henry Wallace, in testifying at the importers' code hearing.

Although he declined to say with what countries the government was discussing the proposition, Eisele said France, Germany and Italy were the largest wine exporting nations and that these had imposed more restrictions against United States farm products than most countries.

Investigate Lynching

Governor Of Missouri Says There Was No Investigation

St. Joseph, Mo.—At the direction of Governor Guo B. Park, who declared there was "no investigation" for the lynching of a young white woman, St. Joseph, Mo., said that the investigation was begun here in an attempt to fix a responsibility for the lynching of Lloyd Warner, 19-year-old negro accused of assaulting a young white woman.

William Sawyer, assistant attorney general, was sent here from Jefferson City to conduct the inquiry.

"If the responsibility for the lynching can be fixed," said attorney-general Roy McKittick, "this office will assist and aid in the prosecution."

Governor Park, who ordered out a National Guard tank company in a vain attempt to save the negro from the mob of whites which stormed the county jail and forced Sheriff Otto Thelen to surrender Warner, said in a statement Wednesday:

"Mob violence, whether in punishment of crime or in attempt to obtain alleged civil rights, is always wrong and destructive of good government. To condone such an offence is to encourage lawlessness, deny the efficiency of the courts and the power of constituted authority."

Ready For Arms Talk

France Willing To Negotiate With Hitler Through Ambassadors

Paris, France.—France is ready for arms talks directly with Chancellor Adolf Hitler of Germany through ambassadors, foreign office officials indicated, but all decisions regarding this must be made in consultation with others of the war-time allies.

Premier Mussolini's pressure to utilize the four-power peace pact signed by France, Germany, Italy and Great Britain, and the British disposition to mediate, it was said, tend toward direct negotiations because France is anxious to avoid little group meetings where she would be urged to sign on a dotted line.

Settlement Plan

British Farmers May Be Established In Edmonton Area

Edmonton, Alberta.—Two or three group settlements of British farmers may be established in Edmonton district at no cost to the city, provincial or federal government, according to Brig.-Gen. M. L. Hornby, of Leithbridge, who is a visitor in the city. He is interviewing various authorities in regard to proposals for assisted British settlement.

The general said that no locations in Alberta had been selected as yet, although two locations had been approved in Manitoba and four in Saskatchewan.

Wheat Shipped To Churchill

Prince Albert, Sask.—Two million four hundred bushels of wheat have been drawn from this division of the Canadian National Railways and now are in storage in the Churchill elevator. The grain was supplied by the Saskatchewan wheat pool and will be shipped out by the Hudson Bay route next summer.

Rescue Plane Passengers

Air Hostess Shows Heroism When Plane Forced Down

Windsor, Ont.—Heroism of Miss Kathleen Smith, Chicago, air hostess, helped the rescue of nine passengers and two pilots of a Detroit-bound American Airways plane which crashed through the ice on Lake St. Clair after being forced down by engine trouble. Standing in water up to her neck, Miss Smith assisted the passengers to climb onto the wings of the plane, where they remained until rescuers arrived.

Passengers were loud in their praise of Miss Smith, who had been with the company only six weeks, and Pilot Smith for the careful way in which he "panicked" his machine in landing.

Ice retarded rescuers who hastened to the scene. It was necessary to break a channel to the stranded plane and for about 20 minutes the passengers and crew watched the battle with the ice until the boats reached the side of the plane. Thoroughly chilled and most of them drenched, the 12 were rushed to a cottage near the river side and given attention. No one was hurt in any way.

Trade Is Doubled

South Africa's Special Agreement With U.C. Brings Results

Vancouver, B.C.—British Columbia trade with South Africa has almost doubled since the special trade agreement went into effect June 30 of this year, and most of the business has flowed through the port of Vancouver, according to a report just issued by the Vancouver board of harbor commissioners. In July, August and September, the values of the export this year was \$2,066,000 as against \$1,079,000 in the corresponding period of 1931.

COMMITTEE TO URGE FEDERAL MARKETING PLAN

Toronto, Ont.—Representing the agricultural interests of the Dominion, a committee was appointed by the Dominion-wide marketing conference to press for federal marketing legislation after the conference and passed a resolution calling for representations to the federal minister of agriculture.

The conference closed with the passing of the resolution.

The committee includes: A. Amos, president of the United Farmers' Co-operative Company, Limited, with R. H. Milliken, K.C., and H. B. Cowan, Peterborough, as chairman, secretary and assistant secretary respectively. Western members are: W. A. Landreth, Winnipeg; A. H. Mercer, Vancouver; P. Roblin, Saskatoon.

The resolution urges the minister of agriculture to "forthwith cause to be prepared a farm products marketing measure which, insofar as federal legislative authority extends, will enable the producers of agricultural products in any part of Canada to take advantage of legislation that may be federal or provincial, embodying the principles of the British Agricultural Marketing Act and that such federal legislation, before enactment, shall be submitted to the committee appointed by this conference to promote the enactment of such legislation."

DUKE OF ATHOLL CONVICTED OF BREAKING LAW

Here we see the Duke of Atholl (left), chatting with a police sergeant outside Bow Street Police Court in London, after he had answered a summons alleging an infringement of the Lotteries Act of 1923. The Duke conducted an Appeal Fund for British hospitals and issued tickets. He was found guilty and his conviction cost the 66-year-old Scottish peer a fine of £25 and court costs of 35 guineas, whereas his "appeal" took in \$740,732, more than one-third of which was handed over to hospitals. The Duke will appeal the case in a higher court.

SIR ARTHUR CURRIE

Commander-in-Chief of the Canadian Army Corps in France during the Great War, who died in Montreal on Nov. 30.

Stock Awards

Should Be Awarded On Basis Of Real Value

Toronto, Ont.—Unless prizes on the basis of real value are given, the progress of agricultural exhibitions and the assistance given them by the federal government fail, said Hon. Robert Weir, Minister of Agriculture, in addressing a luncheon of exhibitors at the Royal Winter Fair here.

"For example, if two men sit up with a horse from midnight until the time he enters the ring, making one had look back like the other good one, and the horse wins, it isn't the horse that wins, it is the two men who sat up with him," remarked the minister.

Mr. Weir said exhibitions should stress in their prize lists the importance of breeding qualities. Unless the get of a sire or dam showed some of the characteristics that made the sire or dam a prize winner, the awards were not made on a true standard basis, he said.

The federal minister addressed a distinguished gathering that included Hon. W. C. Buckle, Saskatchewan Minister of Agriculture, and Hon. George Hoadley, Minister of Agriculture for Alberta.

Fire At Indian School

Laundry And Hospital Of Alberta Institution Were Destroyed

Grouard, Alberta.—Fire, which broke out in a laundry room, destroyed the laundry, hospital and two adjoining classrooms at St. Bernard Indian Settlement, a Roman Catholic institution near here.

School dormitories and the bishop's palace were saved by valiant work on the part of boys and girls and residents of the settlement, according to word reaching here. There was no loss of life.

Rt. Rev. Bishop Guay, in whose diocese the fire occurred, is receiving treatment at St. Boniface, Man.

Limit On Dumping Duty

Ottawa, Ont.—An order was issued by the Department of National Revenue late Wednesday that Canada would not impose a dumping duty to offset depreciated currencies of foreign countries unless the foreign currency was at a discount of over five per cent. in relation to the Canadian dollar. This will have a far-reaching effect in connection with importations from the United States.

Christmas Broadcast

Bells From Church Of The Nativity At Bethlehem To Be Heard

Ottawa, Ont.—The Canadian radio broadcasting commission arranged to co-operate with the British broadcasting corporation in its plans for an empire Christmas broadcast program. The program will include messages from Ottawa to other parts of the empire.

Under the revised plans of the British broadcasting corporation, one part of the empire broadcast will take place December 24. This will be a broadcast from Bethlehem of the bells of the Church of the Nativity. It will come through at 3 p.m., Eastern Standard Time, in Canada.

On Christmas Day the broadcast will start at 9 a.m. (E.S.T.), in Canada. The first 45 minutes will be largely taken up with a description of the celebration of Christmas in various parts of the old land. The following 15 minutes, until 10 a.m. (E.S.T.), will be occupied by messages of greeting from various parts of the empire.

Finally, from 10 to 10:05 a.m., there will be a message from Sandringham by His Majesty, the King.

The Canadian radio commission has arranged to bring the program to Canada by trans-Atlantic cable and will distribute it over its network wires to broadcasting stations in all parts of the country.

Alberta Pool Earnings

Figures Show Net Amount Of \$179,054.64 For Year Ending July 15

Calgary, Alberta.—Operations of the Alberta Wheat Pool for the business year ending July 15 showed earnings of \$997,948.88. It was reported at the annual meeting by R. D. Purdy, general manager.

Net earnings were \$179,054.64, after providing \$338,000.00 for depreciation and payment of \$283,430 interest to the Alberta Government in connection with the 1929 overpayment.

The total holdings of the pool during the year were 488,590,660 bushels, showing an average of 105,233 bushels per elevator. In 1932 the amount handled by pool elevators was 91,411 bushels per elevator.

PASSING OF GENERAL SIR ARTHUR CURRIE

Montreal, Quebec.—Sir Arthur Currie, commander-in-chief of the Canadian corps in France, died here Nov. 30. He was 67 years old. Since 1920 he had been in England and vice-chancellor of McGill University. Death occurred at 2:50 a.m.

Sir Arthur was taken to hospital Nov. 7 suffering from blockage of a blood vessel in the mid-brain.

The former soldier made an impressive last fight. Pneumonia developed Sunday to complicate his condition, however, and hope had to be abandoned.

Sir Arthur's distinction was chiefly due to his success as a soldier and a commander, but capacity for organization led to his reputation being further enhanced after he became head of McGill.

Arthur William Currie was born in Napier, Middlesex County, Ont., Dec. 5, 1875. He went to the Pacific coast in 1894 and soon took an interest in military affairs in Victoria. He went overseas with the rank of brigadier-general as commander of the 2nd Canadian infantry brigade. In September, 1915, he was appointed commander of the 1st Canadian division, which post he held until he became commander-in-chief of the Canadian corps.

Besides Lady Currie, Sir Arthur is survived by one son, Garner Ormsby Currie, a student at McGill, and one daughter, Mrs. A. T. Gall Durnford, wife of a well known architect here. A Lady Currie was Lucy Sophia, daughter of Mr. and Mrs. William Chaworth Chaworth-Musters, Nottingham, England.

In 1917, after the battle of Vimy, Sir Arthur became commander-in-chief and received his title K.C.M.G. He had received the first order of knighthood, Commander of the Bath, in 1915 following the second battle of Ypres.

The tragic victory of Passchendaele was won in November, 1917, and he organized the preparations for the 1918 offensive. On August 8, 1918, Sir Arthur led the Canadian corps—developed to a high state of efficiency—at the battle of Amiens and the victorious advance. The battle of the Canal du Nord, perhaps the most brilliant feat of arms in the war, was planned and carried out by the Canadian commander.

SAYS BRITAIN MUST BUILD UP HER AIR FORCE

London, Eng.—Emphasis to Britain's policy that the principal nations of the world should seek parity of air power was given in the House of Lords by the Marquess of Londonderry, secretary for air. It was coupled with the threat that if other nations are unwilling to reduce their air arms to the level of Britain's this nation will have "no option but to begin to build upwards."

The House of Lords was presented with figures purporting to show Britain has lost her position of first ranking air power and has fallen to fifth place. With this was coupled the assertion that the British air force is considered a defensive arm.

The marquess' remarks, considered an expression of government policy, caused one of the most extraordinary scenes ever witnessed in the House of Commons when members found themselves unable to gain any information on it from government leaders in that chamber.

To the lords, the marquess said: "The approval for an increase in American air strength and the embarkation of an enlarged program by the Japanese and Russians are causing great concern. He expressed the hope the powers would agree on figures that would bring parity at the lowest possible figure."

A sharp issue arose in the House of Commons, when Morgan Jones, Laborite, walked over from the House of Lords where he had been listening to the Lord Londonderry and attempted to question the government on that peer's statement.

For hours previously the House had been debating a private member's motion—a motion which affords opportunity for debate but does not bind the government—urging inadequacy of the present air defence.

Imperial Co-Operation

Strong Policy Is Necessary To Overcome Difficulties

London, Eng.—"We must recognize that for the time being world co-operation is impossible, and concentrate upon devising ways whereby we of the British Empire can help ourselves to overcome immediate difficulties and get our people back into employment," declared Stanley Bruce, Australian high commissioner to Britain, in a speech before the Empire Industries Association.

Failure of world conferences and of world co-operation made a driving force for the British Empire imperative, said the former Australian prime minister. He suggested creation of a small group of the best men available, to devote all their time to formation of a strong resolute policy of imperial co-operation.

Obstacles to British trade have arisen in the form of prohibitions, quotas, and tariffs. Mr. Bruce went on, and the development of Japan, with her different standards of living had created a new problem. The paramount necessity at present was a strong policy of imperial co-operation, in his opinion. He suggested such a group as he mentioned might be presided over by a British cabinet minister, if that were deemed desirable.

Messages Of Condolence

King And Queen Send Message To Lady Currie

Montreal, Que.—Lady Currie received two messages from His Excellency the Governor-General, one on behalf of King George and the other a personal one from Lord Beaverbrook, expressing condolence in the death of Sir Arthur Currie.

Lord Beaverbrook sent the following message to Lady Currie on behalf of King George:

"I am commanded by His Majesty the King to convey to yourself and the members of your family the heartfelt sympathy of His Majesty and of Her Majesty the Queen."

The Governor-General's personal message follows: "I have learned with deep regret of the death of your most distinguished husband. His passing is a loss, not only to the university and the city which claimed him but to all Canadians, especially those who had served under him as soldiers."

This Claim Is Different

Toronto, Ont.—R. H. Neil appeared before the pension commission here and asked for a pension increase for loss of his hair during the war. He claimed fever contracted in the trenches removed his hair. Neil maintained he should be recompensed for the cost of five wigs.

Has Limited Number Of Feminine Workers

Mussolini Practically Abolishes Their Employment In Public Offices

Premier Mussolini will abolish the employment of women in public offices in an order demanding that the number of feminine workers in many state offices be limited to five per cent. of the total number of workers on the payroll.

This limitation applies to state, provincial and communal offices and to state financial concerns. In "inferior" forms of employment—which referred principally to telephone operators—women may number 20 per cent. of the total.

The order added force to the effort Dr. Duce has been making to induce the fair sex to tend house and raise families.

Employment in schools and hospitals was not affected by the order.

A Curious Town

Buchans Mines, Newfoundland, Not Keen About Admitting New Residents

One town that's 100 per cent. alive is Buchans Mines, Newfoundland. There are no dead there, because persons who die are shipped home for burial. The town has few natives—it is scarcely seven years old—and it has no cemetery.

Buchans Mines is a curious town in other ways. Most of its population of 1,800 work for the Buchans Mining Co., and outsiders must have a cool reception. It is a "closed town" and permission must be secured from the company before new arrivals can take up residence.

The place has only two furnaces. These form a large central heating system, from which steam is piped underground to almost all the town's homes. Although the town is still in infancy, almost all modern conveniences are available to its residents.

Develops Cheap Method Of Producing Hydrogen

Engineers Claim Invention Of Novel May Revolutionize Industry

Working in an improvised prison laboratory, a convict in Folsom Prison, California, has developed a system of making hydrogen at a cost experts estimate at one forty-fifth the present commercial production charge.

Engineers who witnessed a demonstration by the convict, James F. Burke, said his method may revolutionize the hydrogen industry.

Using four salad dressing jars, a single dry cell and other home-made equipment, Burke made hydrogen in a small room off the office of Warden Court Smith.

The convict claims to have developed a "depolarizing" solution which hastens the decomposition of water into hydrogen and oxygen, its principal elements.

Poison Ivy

Actual Contact With The Plant Necessary To Be Affected

The virulent essence of poison ivy does not vaporize and therefore simply being near the plant is not dangerous. One must have actual contact with the poison of the plant to be affected.

This is the conclusion of a study of poison ivy being made by Wesleyan University scientists in collaboration with the National Research Council of Canada.

In the folklore of poison ivy are many stories of persons so sensitive that even the wind blowing over the plants will poison them. The Western studies show there must be some tangible substance to act as a carrier from plant to person.

Self-Control Of Men

Force Which Enables Them To Govern Outside Influences

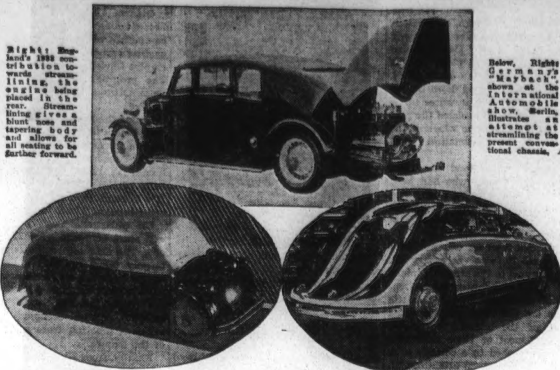

Men and women are not like leaves, blown about by every wind, or like clay, receiving and retaining whatever impress is made upon them. They have an inward force, enabling them to control, to a large extent, the influences that bear upon them—to welcome some, to resist others, and not only passively to receive, but actively to digest and assimilate that which they receive, so that it becomes a very part of themselves.

A Common Occurrence

The conitable call at a villa and ring the bell. Inside the house the piano-playing ceased and a rather scared-looking young woman appeared at the door and asked, "Yes? What do you want?" "Well, Miss," said the constable, "we've just 'ad a telephone call to say that the Duke called Mozart being murdered in this 'ere 'ouse."

W. N. U. 2023

Streamlining Breaks "Horse-and-Buggy" Precedent

Right: Buick's latest streamlining, the Buick Wildcat, is being placed in the wind tunnel. Streamlining gives a blunt nose and tapering body and allows for all coming to be further forward.

Above, Left: An American design undergoing wind-tunnel tests, and which makes a complete break from all horse-and-buggy precedent. Engineers have found that a blunt nose and tapering body offers the least resistance to wind, conserves fuel, places all the passengers forward of the rear wheels and permits of chassis improvements that eliminate jolts and ripples in riding.

Engineers of three of the world's great engineering nations are devoting more and more of their time to the study of aerodynamics, or streamlining. The Institute of Aero-Dynamic Research predicts there will be revolutionary changes in the automobile of the future.

Registered Seed

Westerners Capture Many Prizes At Toronto Fair

Western Canadians obtained many prizes in seed exhibits at the Royal Winter Fair.

In the registered or certified seed section Andrew Giffen, of Okotoks, Alberta, was first in barley, two-rowed varieties approved for registration, including Hanchen Charlotte, town 80, Duckbill and Canadian Thorpe, James Rugg, Elatow, Sask. was second.

Other results were:

Clover and grass seed certified included: Sweet clover (8)—W. J. Bryant, Bovie, Alberta; 6, James Rugg, Elatow, Saskatchewan; Alsike (14)—H. Dahl, Duesch, Alberta.

Alfalfa (19)—A. Turkewich, Winnipeg, Boesch, Man. Western rye (2)—L. Arthur M. Smith, Wembley, Alberta; George Stoll, Wembley, Alberta.

Brome (1)—E. Harrop, Hualien, Alberta.

Championship beans—A. Griffin, Brooks, Alberta.

Standardization Methods

British Marketing Act Is Also Applicable To Canada

Principles of the British marketing acts were applicable to Canada also. L. F. Burrows, Ottawa, secretary of the Canadian Horticultural Council, told the Canadian agriculturalists' leaders in conference at Toronto.

"In this country, as elsewhere," he said, "legislation has proved necessary to put the standardization of farm produce on a national basis."

Although others are affected, the produce has most at stake and the most to lose by continuance of the present economic troubles, according to Mr. Burrows. Co-operation of all agriculturalists was necessary, he emphasized.

Mr. Burrows said under the British acts a two-third majority of producers must favor a marketing scheme before it comes into force. When approved the marketing scheme will have the force of statute.

Girls Working On Subway

Thousands Helping In Construction Under Streets Of Moscow

Nearly 15,000 members of the Communist Youth League, thousands of them girls, are at work with pick, shovel and electric drill under the streets of Moscow, building Russia's first subway, according to the construction administration. The enlistment of Young Communists for this work was begun when lack of construction slowed up through lack of effective labor. In the beginning the young people were slow to abandon their clean office jobs for hard labor underground.

Well Lighted For Fete

Three hundred thousand colored lights and many powerful searchlights transformed Blackpool, England, a resort town, into a city of brightness during the autumn illuminations fete. The illuminations required more than 20 miles of wiring. One railway ran more than 2,100 special trains to and from Blackpool during the event.

Life may owe you a living but you have to collect it.

Medical Service By Radio

Treatment Prescribed For Residents In Northern Areas

For some time university extension courses have been a feature of some of the radio programs in Canada, but a further use of the radio has been introduced by the Canadian Government Department of Health in Ottawa for the benefit of those living in the remote districts of the Northwest Territories where there is no medical doctor. A radio service is now maintained between all the settlements in the northern areas of the Dominion and the Department of Health.

When a person requires medical treatment the symptoms and condition are transmitted to Ottawa by radio and a qualified doctor prescribes the necessary treatment and if medicine is required a prescription is given, for at each settlement a supply of drugs is kept on hand. As a result of this service, relief has been brought to the patient and sometimes when it has been thought that the complications were serious a quick improvement has resulted from following the instructions given from Ottawa by radio.

Most of these stations in the far North are several days' journey from a doctor, but only a few seconds distant from Ottawa by radio.

Both Somewhat Changed

Woman Visits Chicago In Dress She Wore In 1893

In 1893 Miss Mary White went to the Columbian Exposition at Chicago in a dress which she had made for herself.

In 1933 Miss Mary White went to Chicago to a Century of Progress in the same dress.

Both the dress and Miss White were changed somewhat, the dress having had its total area reduced by six or eight yards of fine silk and Miss White having bowed perceptibly under the weight of 40 added years.

Nevertheless, both still were able to put in a full day at the fair.

Postal savings depositors in Japan are increasing in number.

Distribute Reading Matter

Books For Rural Areas Of The West Through Agency Of Saskatoon Public Library

Meeting a long-felt want of country people for literature with which to while away the monotony of winter evenings, 5,000 books soon will be made available to rural areas of Saskatchewan by the Saskatoon Public Library.

Conceived by Angus Mowat, local librarian, this costing distribution of 5,000 volumes may be only the start of widespread circulation of books in needy areas of the prairies, Canadian Pacific and Canadian National Railway Companies have agreed to carry second-hand books free of charge from eastern Canada to the west.

Inauguration of the scheme was furthered in the west by Mr. Mowat and in the east by George H. Locke, chief librarian of the public library of Toronto. Mr. Locke interested himself in the plan after hearing of the great need for reading material in the west through a letter from Mr. Mowat.

Piscatorial Discovery

British Columbia Pichard Close Relative Of Sardine

British Columbia and Europe are a long way apart, but there are family ties between some of their fish.

For instance, British Columbia's pichard, a tasty food, is a close relative of the trans-Atlantic fish whose young are the sardines of European commerce.

Both species belong to what the scientists call the clupeidae family, whose other members, by the way, include such well-known Canadian fish as the alewife or gaspereau, the herring, the shad. To call it by its full scientific name, the British Columbia pichard is clupeoides canadensis and its close relative of European waters is clupeoides pichardus.

A small part of the British Columbia pichard catch is marketed in the fresh form and some is canned, but by far the greater part is used in the reduction plants in producing fish meal and oil.

Smashing The Atom

Spectacular Demonstration By American Scientists

To the roar of thunderous reverberations that rolled through the lofty spaces of an airplane hangar, nearly five times more continuous direct current voltage than has been generated before in the history of the world was sent crashing into space.

A little group of scientists and newspapermen at South Dartmouth, Massachusetts, watched as science's latest siege gun, two big spherical atom-busting terminals, mounted on tall columns of insulation, barked away at each other with 7,000,000 volts of electricity.

It was a day of triumph for 32-year-old Dr. Robert J. Van de Graaf, research associate in the department of physics of the Massachusetts Institute of Technology Chambers, who for the past six years had worked on the development of a machine which would wrest from the atom the secret of its internal construction.

Spectacular as was the demonstration, it was only the first step in a path that Van de Graaf and his associates believe will lead to the exploration of a field of extraordinary scientific significance. The voltage which went hurtling inwardly from one to the other of the great spherical terminals, will soon be harnessed and put to work.

Eventually Van de Graaf and his associates hope that disintegration of atoms may shed an entirely new light on the structure of matter, the transmutation of elements, and lead to a more complete knowledge of cosmic rays.

Fields Of Taxation To Be Surveyed

Order-In-Council Approves Alberta Taxation Inquiry Board

With J. P. Percival, deputy provincial treasurer, as chairman, the Alberta taxation inquiry board has been appointed by order-in-council for the purpose of making a thorough survey of all fields of taxation, both provincial and municipal, throughout the province.

The three members of the present Alberta assessment commission, W. D. Spence, John Gal, and J. J. Dugan, will be included in the personnel of the new board, while J. C. Thompson, provincial auditor, will be another member, and Hugh Baker, lately of the Alberta government offices in London, England, will be secretary.

Passed Voice Test

Record Made By Prince Of Wales Was Quite Perfect

Prince George recently made a gramophone record of the Prince of Wales' voice. He was on a visit to transphone and radio factories at Hayes, Middlesex, in his capacity as home office factory inspector.

The record, an Armistice Day speech by the Prince of Wales in preparation for Nov. 11, was tested for any of 21 different faults, and finally passed "o.k." After making a coil for a radio set, Prince George asked why there were no men employed in this department.

He was told that some of the wire used was much finer than human hair, and it had been found that only girls had the delicacy of touch necessary to wind it without breaking it.

Registry Of Aircraft

Great Increase In Number Of Machines Inspected By Lloyds

Lloyd's has been known throughout the world for its registry of shipping. But aviation has assumed so great importance that the society began last year the inspection of aircraft. Up to the end of June last, 453 aircraft were inspected for renewal of certificates of airworthiness, and 183 for damage, condition, etc., on behalf of underwriters and others, indicating increases of 70 and 55 machines respectively in each class of inspection as compared with the previous twelve months.—Toronto Mail and Empire.

Baptist World Alliance

To Meet In Berlin, Germany, Next August

The Baptist World Alliance announced it would hold its 1934 meeting in Berlin, Germany, Aug. 4 to 10. The convention is held every five years.

Tentative plans to meet next year in Switzerland because of "unhappiness" in Germany, were abandoned when the executive committee decided that no reason now existed to prevent carrying out the original plan for meeting in Berlin.

November is the harvest month of Peru and South Africa.

The Atlantic Ocean is crossed by 21 cables.

Many Uses For Poplar

Possibilities Of Canada's Most Abundant Hardwood Seen Endless

Poplar is the most abundant hardwood in Canada, and its fuller utilization is of great economic importance to Canada in the more complete development of its forest resources. Poplar lumber is white in color, light in weight, and, being practically tasteless and odorless, is used to a considerable extent in wood containers. Flour barrels and apple barrels are being made from poplar staves, and butter boxes also have been made to some extent of poplar, though spruce is most generally used for this purpose.

In Canada, excelsior is made almost exclusively from poplar. The softness of the wood, the white color, and its lack of distinctive odor, make it particularly suitable for this purpose. Matches of the "white" type are made from this wood. In England, where European poplar has been used extensively for match manufacture, trial shipments of Canadian poplar are now being used in match plants; if these trials prove successful their use will provide an outlet for large quantities of this wood. Poplar is also used in Canada in the manufacture of soda pulp, from which book, blotting, and other soft, opaque papers are made. This pulp does not require a large-sized wood like spruce.

Poplar is easily cut into veneer and is also an excellent wood for core-stock in plywood manufacture. It has good gluing properties and when properly dried, under conditions such that it is protected from the weather, will remain "set" quite as well as other hardwoods. Very fair flooring has been made from this wood, particularly in the western provinces, where its availability gives it an advantage over other flooring woods which have to be shipped long distances. This applies also to interior trim, window sash and frames, and other parts of frame house construction.

Poplar is generally known as a perishable wood, difficult to dry; this is, in a sense, true. In the green condition poplar may easily become infected with fungi, with consequent rotting of the wood; this is particularly true of the sapwood. The exercising of certain precautions in the interval between the felling of the tree and the conversion of the log into lumber will prevent this, and the observation of good drying practices, the manufactured lumber may be seasoned without much loss through degradation caused by either rot or twisting and warping.

The Forest Products Laboratories of the Forest Service, Department of the Interior, Ottawa, have devoted a good deal of time to a study of the possibilities of developing additional uses for poplar, and have assembled considerable data of interest to consumers and producers of this wood.—St. Thomas Times-Journal.

Heavy Cattle Losses

During Bad Winters

Severe Weather Recalled By Pioneers Of Early Days

Severity of the winter in the High River, Alberta district to early years of the century there difficult winters in the early days.

One old-timer who arrived in the early eighties, recalls that at that time he noticed tall trees with their tops cut off. He was curious as to the reason, and an old Indian told him that the tops of the trees had been cut down for feed for the animals in the "bad" winter. He presumed that the "bad" winter of the Canadian Indian would correspond with the winter of 1862, which is recorded in the diaries of pioneers of Oregon and Washington. Stock losses were enormous in the western states that year, though there were no herds in Canada.

However, southern Alberta ranchers do not need to go back to 1862 for experiences of disastrous winters. The winters of 1886, 1890 and 1919 each brought problems of feed that wrought great hardships on the industry.

Hunting With Camera

Visitors To Africa Get More Excitement Than With Rifle

Lion hunters in Africa have discarded the rifle for the movie camera, according to Robert Mendel Kohn, new consul-general of Great Britain at New Orleans, formerly of Zanzibar, Africa.

"It is more exciting and dangerous to hunt lions with a camera, hence hunters have abandoned guns except as defensive weapons in case of attack," Kohn said.

Though not a hunter himself, Kohn said he enjoyed the sport of tracking down game. He was stationed in Africa five years, and spent 25 years in the British diplomatic service.

RICH IN VITAMINS

OCCASIONAL WIFE

By EDNA ROSS WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student, and Peter Anson, a struggling sculptor, fall in love and marry secretly, deciding to live apart until the time Peter can establish himself. Camilla, the adopted daughter of wealthy parents, is not to inherit money when she comes of age. She is preparing herself for life with a course in commercial art, hoping to get a job to enable her to support herself. She has been making the rounds of the agencies. Peter, working in his studio on an idea for a figure with which he hopes to win a scholarship to study abroad, receives a call from a beautiful model, Sylvia Todd, who offers to work for almost nothing if he will employ her. He cannot afford a model, but promises to think it over.

(Now Go On With The Story)

CHAPTER XX.

When Sylvia Todd had gone, Peter paced the floor in agitation. Her visit had resurrected again that fond dream of his life—to study abroad with Despone and enter at the Trocadero. Of course, working the exhibit did not guarantee the opportunity, but he believed that he stood the chance with anyone. It was, at least, a chance.

But with his marriage to Camilla, he had put that hope aside resolutely. Should he win the scholarship, it would mean that he must take Camilla with him and support her, or leave her behind. He could not do the former and he would not do the latter. So he had convinced himself that there was little chance of his winning, and decided to devote his time to more remunerative pursuits.

Whether or not Camilla wanted him to feel responsible for her, he did, and he must see to it that he could take care of her soon. Furthermore, he had resolved that if art for art's sake did not begin to pay dividends soon, he would commercialize it.

But Sylvia Todd—a beautiful girl—had stirred again that greatest ambition which he would have sacrificed to nothing in the world except his love for Camilla. He was restless all day, could not work in the studio. He went to the park after his class and wandered about aimlessly, thinking, debating what he should do. Perhaps if he entered the exhibit and lost, it would be the best thing for him, after all. He would have the satisfaction of knowing that he could not have gone abroad, anyway. At least, he would be more settled and content.

Strangely enough, when he saw Camilla that same evening, it was she who introduced the subject that weighed most heavily upon his mind. "By the way, Peter, have you decided anything about your entry for the exhibit?" They had strolled to the park, where it was slightly cooler, and the day had been oppressively warm and the studio stifling.

He started, as if she had struck

Headaches, Dizzy Spells

Mrs. Jennie Smith of 46 Leppa St., St. Catharines, Ont., says: "I suffered from headaches and dizzy spells for some time. I was told to try Dr. Williams' Pink Pills. I took them and I feel much better. I can now do my work without any trouble."

him, for he was still revolving the matter in his mind. "Funny you should ask that, when I've just been thinking about it all day."

"Why shouldn't you be thinking about it?" she asked, amused.

"Because I had stopped thinking about it," quietly.

Camilla faced him. "Stopped thinking about it?" Why, Peter Anson! Since when?"

He avoided her eyes. "Well, I thought I hadn't much show of winning and—"

"No one has better," she contradicted him.

"There will be more entrants than usual this year. The closer money is, the more there are who try for scholarships."

"And what if they do? Even if you should not win, you could lose nothing."

"And if I should win—," he hesitated.

A moment of poignant silence and then Camilla understood. "Is that what has troubled you?" Oh, Peter, darling, why didn't you tell me?" she cried with consternation.

"But you know, dear, that you are much more important to me than the National scholarship. Winning it would mean that I go to Paris for a year—and I couldn't take you with me."

"Why, Peter you 'have' to try for it. And if you win—we'll manage somehow," bravely. "Oh, I never should have married you, Peter. Already, I am ruining your life."

"Please, Camilla, don't say that. Why, if you want me to try, I shall. But that doesn't mean I'll win, you know."

"And if you don't your work will attract attention—perhaps sell for a good price. Peter, what do sculptors get for their work? I haven't the slightest idea."

"And you married a sculptor?" he asked, amazed.

"I married the man I love."

"You darling!" he drew her close into his embrace and rested his lips on the top of her fragrant hair, reverently.

"But you didn't answer my question," she insisted from the curve of his shoulder.

He laughed. "Well, the rewards of sculptors pour out as much as those of any profession of the arts. Much depends upon the needs and resources of the patron, the popularity of the artist and the critics. One jazz band can command thirty thousand a week while another is glad to accept one thousand. Their merits may or may not compare. It depends upon other conditions. Chester Dane did a piece of work last year that sold to the Wistar Galleries for forty thousand dollars. It was marvelous, of course, and I don't presume to be a Chester Dane."

"You can be a Peter Anson, and that is better," she declared quickly. "Oh, Peter, you will be famous. Nothing can stop you."

Holding her in his arms, her words were so convincing that his hopes leaped to new heights and he was again sure of himself.

"Nothing shall," he vowed.

"Have you planned what you will do?"

"I had several ideas before I tried to stop thinking about it. What really got me going again was a model who came in this morning and wanted work. She said she heard I was entering the exhibit and needed one."

"You will, won't you?"

"Of course. But I don't see how I can afford—"

"You will have to manage somehow, Peter. I'll help you. I'm sure I shall find some work soon, and that will help both of us."

"Not much, little lady. Aren't you refusing to let me take care of you? I'll do the same."

"But that's different," she objected. "That would not be taking care of you—it would be an investment in your future."

"The same circumstances by which other names would make me just as dependent. No—I'll work it out some way. As I should have done without you. Wasn't that our plan and agreement?"

"All right," agreed Camilla. "And the model—will she do?"

"Couldn't be better," he replied. "Would you believe it, dear, the poor kid was hungry and had walked all the way from seventy-fifth street?"

"And you trusted her away?"

"Say—what do you think I am—a Scrooge?" he laughed. "No, I gave her a dollar for some dinner and told her I'd let her know tomorrow if I could use her."

"You were pretty sure you would need her."

"No, I never would have decided if you had not urged me. I'm sorry I didn't take it over with you before."

"Please always talk over everything with me, Peter, won't you? I don't your interest mine, too?"

"Of course, forgive me, dearest."

YOUNG MOTHERS

Don't experiment with children's colds... Treat them as your own mother did—externally. No dosing! Just rub throat and chest with...

VICKS VapoRUB
PROVED BY 2 GENERATIONS

But I thought I was protecting you in this.

"Don't you suppose I should have been very much grieved if I had discovered too late that I had kept you out of the exhibit?"

"I see your side of it now, yes. I'm sorry."

"There are always two sides to anything which concerns you and me, Peter. Remember that, won't you?" she pleaded anxiously.

"Always," he pledged, with a firm, hard kiss.

Presently, he said, "Now help me decide about the subject. Of course, a fountain idea is always good stuff. I don't dare to plan for more than one figure because I couldn't afford several models—"

"But you must not sacrifice success to a meager expense like that," Camilla objected vehemently. All her life, she had been accustomed to extravagance and luxury of the sort in which the Hoyts indulged, and this realization of what a little money could mean to an ambitious youth, appalled her. She rebelled at the ignominy of it.

"I don't think that will be necessary," he reassured her. "I had thought of making a full figure standing, wearing a draped tunic—madonna-like, pouring water from an urn into the upstretched hands of a child, with a smaller child kneeling below and catching the water again in its cupped hands, gleefully. Woman pouring out her life to youth."

"That would be beautiful," she exclaimed softly.

"But nudes always are favored," Peter continued. "Of course, they are more difficult, and should be. For such a figure I had an idea of youth symbolized as drinking eagerly of life—a girl poised on tiptoe and her hands holding to her lips a graceful chalice or cup of life."

"That is lovely, too; perhaps better than the other. You must decide. You do have marvelous ideas, darling."

"Have you something different to suggest, dear?"

"I'm sure I couldn't improve on your idea, if I thought about it for weeks. And I think this effort should be your own very own idea. I'd rather not interfere, but I'll do anything to help you if you will only tell me what it is."

"Just be your own dear self," he told her, with a new note of winged hope in his voice.

(To Be Continued.)

Farm Fire Insurance

Five-Year Average Shows Companies' Losses \$1.19 For Every Dollar Premium

In 1931 insurance on farm properties cost Canadian fire insurance companies \$1.33 for every dollar paid in premiums. That was a high year. Over a five-year period from 1927 the average losses paid on farm properties amounted to \$1.19 for every dollar paid in premiums. These were not the worst risks—tanneries, woolen mills, boot and shoe factories had decidedly higher losses—but they were in the unprofitable class by a big margin.

Free And Easy Street

For 28 years, Tom Hopson, president of a candy company at Sherman, Texas, has lived on Easy Street. Recently a short street was cut through his property. It was called Free Street. Now Hopson lives on Free and Easy Street.

Women are replacing men as government telegraphers in England.

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge... when you can't stand the children's noise... when you feel a burden... when you are irritable and blue... try this medicine. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

Prove Their Hardiness

Fungus Spores Survive Cold Eleven Miles In Air

First scientific results of Lieut. Commander T. G. W. Settle's stratosphere flight made public showed that life in the form of fungus spores or mites can survive 11 miles above earth where humans would die if unprotected.

Spores of seven kinds of fungi, or tiny plants, which Commander Settle carried to the stratosphere on the outside of his balloon "Gondolo," lived through temperatures far below zero, rarified air, low atmospheric pressure and increased ultra-violet light to which they were subjected to on the trip, reported F. C. Meier, plant pathologist of the department of agriculture.

The spores germinated readily after their return.

It was the first time in the history of science that living spores had been sent to such a height above the earth and brought back for scientific analysis. They were carried inside and outside cotton balls tied to the gondola of the balloon.

The spores were those of common fungi that float about everywhere near the earth's surface. Meier sought to learn how high in the air they might travel and live. The tests show, he said, that these spores, too small to be seen without a microscope, are among the hardest forms of life in existence.

Assured Of New Suits

Fund Left By Baltimore Man Will Benefit Newsboys

Nine newspaper carriers each Christmas day will receive a suit of clothes according to the unique will of Arthur Wallenhurst, Baltimore jeweler and world traveler.

Wallenhurst left certain jewelry to the business managers of three Baltimore newspapers to be sold or raffled, the proceeds to be used to buy suits for three deserving newsboys for each paper every Christmas until all funds should be exhausted.

His largest bequest was one of \$50,000 to be used for the erection of a bronze statue to Martin Luther. He provided for the installation of clocks in four city parks.

THE RHYMING OPTIMIST

By Aline Michaelis

LOVELIER THAN DREAM

How can I doubt that all is well, How can I fear when this I see: The power of the white moon's spell Upon the depths of immensity.

The ordered marching of the spheres That on their endless journey swing, The faith of every seed that hears Above earth's cold the call of spring?

How can I dread lest God, who blends His love with all, should leave me whole, Will fall to make divine amends For every thought of loss or dole?

To sense creation's perfect scheme Its paths of right, its walls of peace, Its truth far lovelier than dream!

Less Cheese Made

Production In Canada Has Greatly Decreased In Past Ten Years

Production of cheese in Canada had decreased to such an extent that it was being crowded out of the British market. Hon. H. A. Stewart, Minister of Finance, told members of the Eastern Ontario Cheese-makers' Association.

Mr. Stewart said during the past 10 years there had been a decrease of 30,000,000 pounds in the amount of cheese produced in Canada while butter production had increased by 40,000,000 pounds. The result of this was Canada had been moved into second place in the British market he said.

L. A. Zuleit, superintendent of the Eastern Dairy School at Kingston, stated Canada's best hope for the export dairy trade lay in cheese production.

Must Speak Four Languages

Police In Waltham, Massachusetts, Have To Be Linguists

Unless you can speak four languages in addition to passing the civil service examination, there is practically no chance of your becoming a policeman in Waltham, Massachusetts. Mayor Patrick J. Dunne rejected the names of three men that had been sent to him as being eligible for appointment as patrolman, because they could not speak German, French and Italian. Due to the number of foreign-born residents in the city, the linguistic ability would prove helpful.

Merging of banks has reached Japan.

Longest Lived Man

Peter Cartan, a Hungarian peasant, is recorded to have been born in 1539 and to have died 1724—he lived 185 years. Thomas Parr is said to have lived 152 years. Methuselah, of bible fame, lived 969 years.

EVEREADY LONGEST LIVED RADIO BATTERIES

Long life and power bring you low operating cost when you use Eveready Layerbilt "B" Batteries. They are built in flat layers without any space, packing almost double the current producing material of an ordinary battery into the same cubic space. Eveready Air-Cell "A" Batteries and the new 2-Volt Air-Cell Radios have produced a new era of radio economy. No more recharging. Ask your dealer.

First Working Man In British Cabinet

John Burns Retired From Public Life In 1918

John Burns, the first working man in the United Kingdom to become a cabinet minister, who has recently celebrated his 75th birthday, gave up the post of president of the government board on the declaration of war by the British Government in 1914 and retired from public life altogether about four years afterward.

He never discussed in public the reasons for his retirement. He left parliament at the end of the war, after having represented Battersea in the House of Commons for 26 years. Mr. Burns, who lives on the north side of Clapham Common, is a great authority on London life and history.

Going To South Africa

Government Invites Prince George To Pay Official Visit

Prince George has been officially invited by the Government of the Union of South Africa to visit that country during the early part of next year. His Majesty has approved of the visit, so that the Prince, under present arrangements, will sail from England about the middle of January.

This will be Prince George's first visit to South Africa, although he has visited most of the other Colonies of the Empire. Many of his previous visits to foreign countries were paid when he was in the Navy. During that time he saw service with the Mediterranean and Atlantic Fleets, the China Squadron, and on the American and West Indies Station.

Famous Men Good Knitters

One Has Even Invented Special Wool-Winding Machine

The fact that the Prince of Wales recently sent a scarf he had knitted himself to the Personal League of Service has caused a good deal of interest. His Royal Highness is, however, far from being the only celebrated man who finds relaxation in a pair of knitting needles. Lord Jellicoe, like many other sailors, is an expert at knitting. Sir Evelyn De la Rue, of the famous printing family, is also an expert knitter, and even invented a special wool-winding machine for his own benefit.

England Keeps Old Buildings

Removal Of Historic Castles And Abbeys Is Forbidden

Glories of the past are being preserved now before the march of time has destroyed them. In London and the neighboring counties of Middlesex, Surrey, Kent, Essex and Hertford, there are about 250 castles, abbeys, and other historic buildings, and relics which have been scheduled as "ancient monuments," and as such they must not be removed or interfered with in any way.

Canadians Using More Snuff

Canadians are chewing more snuff. In September, 1932, a total of 71,254 pounds of snuff were imported into Canada, a bulletin from the department of national revenue tells us. This year, for September, the total was up to 74,899 pounds. That is a sign of recovery that cannot be sneezed at.

Little Helps For This Week

"Take no thought for your life, what ye shall eat or what ye shall drink: nor yet for your body, what ye shall put on:—Matthew 6:25.

One there lives whose loving eye Guides our earthly destiny; One there lives, who Lord of all, Keeps His children last they fall; Live we then in love and praise, Trusting Him through all our days, Free from doubt and faithless sorrow, God provideth for the morrow.

It has been well said that no man ever sank under the burden of the day. It is when tomorrow's burden is added to the burden of today that the weight is more than a man can bear. Do not carry this load at any time. If you find yourself so loaded at least remember this, it is your own doing, not God's. He begs you to leave the future to Him and think only of the present.—O. MacDonald.

One evening when Luther saw a little bird perched on a tree to roost for the night he said: "This little bird has had his supper and is now getting ready to go to sleep quite secure and content, never troubling itself what its food will be or where it will lodge tomorrow. Like David it abides under the shadow of the Almighty. It is content and lets God take care of it."

Canadian Legion

Ottawa Woman Is Made Life Member Of Organization

Years of self-sacrificing devotion to the cause of the ex-service men of Canada were recognized in a ceremony which saw Mrs. A. J. Freeman, of Ottawa, invested as an honorary life member of the Canadian Legion.

Attended by the executive officers of the Ottawa Branch and by high officials of the Legion, the ceremony took place in Mrs. Freeman's home. Major John S. Roper, Dominion president of the Canadian Legion, formally installed Mrs. Freeman, presenting her with the gold badge and certificate of a life member honors cause."

THURSDAY, Dec 7th, 1933.

Local News

Mrs. Ivor Lewis left on Friday to visit her sister at Vancouver.
A. E. Tibball of Bowden renewed acquaintances in town Monday.

A Turkey Shoot will be held in Crossfield on Wed., Dec. 20. 25c a shot. All big turkeys.

BORN—To Mr. and Mrs. Levi Smith of Rocky Mountain House on Dec. 5th, 1933, a son.

Mr. and Mrs. L. M. Hibler of Madden left on Friday for Rochester, Minn., where Mrs. Hibler will receive medical attention.

A large number from the town and district went to Calgary on Friday last, to attend the funeral of the late Mr. Kolstad.

Glen Williams went to Calgary on Wednesday evening to attend the annual banquet of the employees of the United Grain Growers.

Miss Florence Cruickshank entertained at a very enjoyable party on Friday last. The evening was spent in games and dancing.

G. G. Huser and C. C. Stafford were visitors in town on Friday. Mr. Huser has apparently fully recovered from his recent serious illness.

Mrs. Bishop and Gordon Urquhart of Calgary and C. J. Urquhart of Elmore were visitors at the home of Mr. and Mrs. Wm. Urquhart over the week-end.

A number of our hockey players went to Calgary on Thursday evening last to try out with the Calgary Bronks. Here is one for Ripley's "Believe It or Not" cartoon.

The colored, lights in front of Halliday & Lauts store add a Christmas appearance to Main Street. Toyland is open in the store, and the spirit of Christmas is much in evidence.

Louis Overby commenced flooding the curling rink on Monday and if the present cold weather continues it won't be long before the exponents of the roarin' game will be ready to go.

Archie McFadyen is raising hell in general over the C.P.R. closing the crossing on the highway just north of town. We understand he will appeal to the Privy Council.

Hughie McIntyre is out west among the jack pines and all is quiet on Broadway. Frank Brown was in town for a day or two, but got lonesome and returned to the farm.

Adam Cruickshank, Ed. Meyers, Ed. Clark, and Mrs. G. H. Huser drove to Rocky Mountain House on Friday night and returned on Saturday evening, bringing with them Mr. Huser who had accidentally shot his hunting partner.

Adam Cruickshank has just finished painting a picture of the Huser farm, portraying the home and farm buildings. Mr. Cruickshank has recently finished a number of landscape paintings, which would do credit to many of our supposed artists.

An open air skating rink is being flooded on T. Mair's farm and it is expected the ice will be ready on Saturday. Mr. Mair is doing the flooding himself, while some of his neighbors furnished the pipe necessary to convey the water. There is no charge whatever, but remember, the rink is for school children only.

Evertt Billis, Glen Williams, Ed. Meyers, C. H. McMillan, Ed. Clark, Adam Cruickshank and Bob Smart took in the boxing match at Carstairs on Tuesday night. It was a good card, the preliminaries were exceptionally good, while Sailor Goodland had it all over Young Lust and knocked him colder than a cucumber in the third round.

A jolly surprise party took place at the home of Mr. and Mrs. W. D. (Jim) McCool last Friday evening, when a number of their neighbors and friends from town gathered to honor Mrs. McCool on the occasion of her birthday. It was also the birthday of Mrs. J. Abra, —mother of Mrs. McCool— who was among those in the party. Five tables of contract bridge were played. A sumptuous lunch was served at midnight.

Garnet Oneil Again Heads School Fair Association

School Fair Has Small Surplus

The annual meeting was held in the Town Hall on Saturday, Dec. 2. The attendance was small in numbers but strong in enthusiasm. President Garnet Oneil was in the chair.

The balance sheet read by the Secretary showed a surplus on the right side of the ledger of \$4.09. Considering the lack of Government grants and the large amount of work done on the buildings and grounds, a surplus was really more than was expected.

It was unanimously decided to hold a School Fair next year. Officers elected were as follows:

Hon. President: Mr. Frank Collicutt.
President: Mr. Garnet Oneil.
Vice-Presidents: Mr. George Lesk.
Sec.-Treas: Mr. Harry May.
One director will be appointed by the trustees of each School District joining the Association.

Mr. Collicutt was heartily thanked for his help and interest.

Several schools have signified their willingness to join the School Fair Association next year, and the Secretary will be glad to hear from the remainder as soon as possible.

It was duly moved and carried that the fee remain at \$15.00 for each school, but directors and teachers are requested to stage some kind of a social event, the proceeds from which may be donated to the Association as a supplement to the fee.

The Association intends to sponsor a dance in the U.F.A. Hall on Friday, Dec. 20th; also a concert in March for the same purpose.

Calf Club Meeting
The business of the Boys' and Girls' Calf Club was dealt with immediately following the School Fair meeting.

A statement of the prize money was read by the Secretary and it was decided to divide the proceeds from the sale of beef donated by Mr. Collicutt amongst nine exhibitors of Hereford calves. This added to the Calf Club prize money, one-third of which was obtained from each of the following: The Provincial Dept. of Agriculture, The Dominion Department of Agriculture, and Messrs. Amery & Sons, making the amount won each boy and girl as follows:

Lila Havens \$10.00, Paul Adams 8.75, Donald Lesk 7.50, James Hole 6.25, Clarence Kiddell (Shorthorn) 2.00, Simon Cameron 4.00, Eugene Havens 3.75, William Jones 3.50, Evelyn Havens 3.25, Clara Calvert 3.00, Robt. Sackett 1.00, Catherine Leask 1.00, Ernest Walroth \$1.00.

It was duly moved and carried that next year's Calf Club be held on the same date as the School Fair, also that the competition be for grade calves on 2. Mr. F. Collicutt announced that he would donate another pure bred heifer calf for next year's Club. The conditions to be announced when the Club is re-organized.

A hearty vote of thanks was given to Mr. Collicutt for this kind donation.

The Club is in the position to render financial assistance to any boy or girl for the purchase of a calf, providing his or her parents have sufficient feed to properly raise the animal for the sale. Get in touch with Secretary Harry May for particulars.

Too Much Economy

The Railway Companies in this country have been exposed to a type of uncontrolled competitors, that to say the least is not fair.

The Transportation Companies that operate passenger buses and freight trucks, hire their employees and pay them, we believe, without regard to a controlled wage schedule, and operate on freight and passenger rates just low enough to draw business away from the Railway Companies, while the railways have to pay fixed charges beyond their control.

The Railway Companies have a habit of paying fabulous sums of money to Presidents, General Managers and head officials for the purpose of formulating policies and generally administering the business of the company, and yet they wait till the horse is stolen before putting the lock on the door.

The freight rate was reduced one dollar per ton on coal delivered at Crossfield on or about November first, if this was done about the time their truck competitor started in, they would possibly have retained their business, and perhaps would not have to borrow millions of dollars from the Dominion Government.

The Canadian Pacific has put into effect a regulation whereby the Crossfield station is closed after 5.30 p.m. thus refusing service to the public during the time two passenger trains enter and leaving this station. This we claim is not serving the public, nor is it practicing true economy.

This sort of economy will save a few dollars per month to the Company, in so far as the station agent's salary is cut a certain percentage, but in our opinion if the axe was used on the higher up, and their salaries cut about 50 per cent., a more efficient service could be rendered to the public, which no doubt would be appreciated by the public.

The School Corner

(Edited by the School Reporter)

The junior boys are all set to play hockey and all they need now is the ice. Teams have been chosen and from all appearances, junior hockey will be the game of the season. The boys hope to have their first practise on Saturday and we are certainly glad the slough out west is quite large or there would probably be a considerable number of collisions. We naturally expect there will be several collisions with the ice.

The Arrival of Marcia

By A Grade XII Student

MARCIA was excited and under the circumstances she could be excused. In a few moments she would step off the train and be taken to her aunt Joan's to spend the Christmas holidays. There was nothing exciting about this but Marcia knew the young man whom aunt Joan was sending to meet her would be very nice, for hadn't her aunt said so?

With a groan, the train came to a stop and Marcia jumped out. There he was in front of her—she just knew it was him. Shyly she accosted him. "I'm ready to go—are you going to take me?"

The young man surveyed her curiously, picked up her bags and stammered, "well I—you—oh of course Miss!"

As they walked down the platform Marcia noticed the amused glances which followed them. One man remarked, "Joe's pulling another one on Frank." As the two approached a corner, another young man dashed madly around her and unceremoniously crashed into Marcia's escort, causing him to drop the bags. For a moment the two surveyed each other slowly and a dawning smile broke over the face of the last arrival.

"Well Joe," he remarked pleasantly "you knew she was coming and thought you could get even with me like this. Well, you've won."

"I'll teach you to swipe my fishworms when you're too lazy to dig them for yourself. Next time you go fishing, find your own bait, you villain!" retorted Joe in much anger.

Marcia, who had been staring in open-mouthed surprise suddenly laughed and addressed Frank "Well of course it's your own fault—you should have been on time. For punishment pick up those bags and start your feet." With a lordly air she proceeded

up the street accompanied by a completely abashed young gentleman.
